**Designing Instruction with Generative AI** Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning, motivation, and engagement, educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license. **Machine**

**Learning Applications Using Python** Puneet Mathur, 2018-12-12 Gain practical skills in machine learning for finance, healthcare, and retail. This book uses a hands-on approach by providing case studies from each of these domains; you'll see examples that demonstrate how to use machine learning as a tool for business enhancement. As a domain expert, you will not only discover how machine learning is used in finance, healthcare, and retail but also work through practical case studies where machine learning has been implemented. Machine Learning Applications Using Python is divided into three sections, one for each of the domains: healthcare, finance, and retail. Each section starts with an overview of machine learning and key technological advancements in that domain. You'll then learn more by using case studies on how organizations are changing the game in their chosen markets. This book has practical case studies with Python code and domain-specific innovative ideas for monetizing machine learning. What You Will Learn: Discover applied machine learning processes and principles; Implement machine learning in areas of healthcare, finance, and retail; Avoid the pitfalls of implementing applied machine learning; Build Python machine learning examples in the three subject areas. Who This Book Is For: Data scientists and machine learning professionals. **IBPS RRB Guide for Officer Scale 1 Preliminary & Main Exams with Past Papers & 4 Online Practice Sets 8th Edition** Disha Experts, The updated and revised 8th edition of the book IBPS RRB Guide for Officer Scale I Preliminary Main Exams with Previous Year Solved Questions, 4 Online Tests covers 6 sections asked in the RRB exam: English Language, Hindi Language, Quantitative Aptitude, Data Interpretation, Reasoning, Computer Knowledge, and Financial Awareness.
