### **Simple Ai Note Taking App For Us Audience:**

*The Power of Neurodiversity* Thomas Armstrong, 2025-07-29 From a bestselling author and psychologist an exploration and celebration of neurodivergence completely revised with the most up to date research and insights From ADHD and dyslexia to autism the number of diagnosis categories listed by the American Psychiatric Association has tripled in the last fifty years With so many people affected it is time to revisit our perceptions of people with disabilities Thomas Armstrong illuminates a new understanding of neuropsychological disorders He argues that if they are a part of the natural diversity of the human brain they cannot simply be defined as illnesses Armstrong explores the evolutionary advantages special skills and other positive dimensions of these conditions including autism ADHD dyslexia schizophrenia anxiety intellectual disabilities and mood disorders With an emphasis on positive niche construction for each area *The Power of Neurodiversity* is a manifesto as well as a keen look at disability as well as a must read for parents teachers and anyone who is looking to learn more about neurodivergence

Chatbot Therapy Eoin Fullam, 2025-06-30 Chatbot Therapy A Critical Analysis of AI Mental Health Treatment examines automated mental health therapy in the form of therapy chatbots taking a critical analysis of this new technology Drawing on historical and emerging scholarship on critical theory science and technology studies and critical psychology this project investigates the social life of mental health therapy applications The book unearths the assumptions about subjectivity consciousness and mental health that underpin these applications looking predominantly at Wysa and Woebot but also at other chatbot and non chatbot mental health applications It explores the historical emergence of this technology the technical and design aspects of chatbot therapy apps the therapeutic methods employed and the economic context within which therapy chatbots have developed It centres around the questions of what it means to automate mental health treatment and of how automated interventions alter our understanding of mental suffering and well being This highly topical and interdisciplinary study will be of great interest to postgraduate students and researchers in the fields of critical psychology mental health cognitive science artificial intelligence science and technology studies and critical theory It will also be relevant reading for mental health professionals

Transmedia Selves James Dalby, Matthew Freeman, 2023-10-20 This book examines the mediated shift in the contemporary human condition focusing on the ways in which we synthesise with media content in daily life essentially transmediating ourselves into new forms and re creating ourselves across media Across an international roster of essays this book establishes a transdisciplinary theory for the transmedia self exploring how technological ubiquity and digital self determination combine with themes and disciplines such as celebrity culture fandom play politics and ultimately broader self conception and projection to inform the creation of transmedia identities in the twenty first century Specifically the book repositions transmediality as key to understanding the formation of identity in a post digital media culture and transmedia age where our lives are interlaced intermingled and narrativised across a range of media platforms and interfaces This book is ideal for scholars and students interested in transmedia storytelling cultural

studies media studies sociology philosophy and politics      *Digital Exhaustion* Paul Leonardi, 2025-10-07 A revelatory examination of why you're feeling so worn out and practical daily strategies to change your relationship with your devices. Unplugging is not a long term solution for the stress caused by technology. If you want to keep your job, participate in society and maintain meaningful relationships, you can't escape your many apps and devices. Paul Leonardi maps out an achievable path to reducing your digital exhaustion, drawing on extensive research to show how real people can use technology in healthy ways. These are realistic approaches that won't fragment your attention and deplete your cognitive and emotional reserves. Many of the changes are simple yet surprisingly effective, like waiting longer to respond, making sure you're using the right tool for your task, and being more conscious of the time and energy we allocate to our devices. He also explains the emotional traps that lead us into dysfunctional relationships with our technology and how to escape them. With Leonardi as your guide, you can build stronger connections, be more creative and productive, and create the mental space to reclaim your energy and your life.

Product-Focused Software Process Improvement Dietmar Pfahl, Javier Gonzalez Huerta, Jil Klünder, Hina Anwar, 2024-12-01 This book constitutes the refereed proceedings of the 25th International Conference on Product Focused Software Process Improvement PROFES 2024 held in Tartu, Estonia during December 2-4, 2024. The 18 full papers, 12 short papers, 9 Industry papers, 2 Workshop papers, 2 Doctoral symposium papers, and one Keynote paper presented in this volume were carefully reviewed and selected from 85 submissions. The main theme of PROFES 2024 was professional software process improvement (SPI) motivated by product process and service quality needs. The technical program of PROFES 2024 was selected by a committee of leading experts in software process improvement, software process modeling, and empirical software engineering.

The De Gruyter Handbook of Robots in Society and Culture Leopoldina Fortunati, Autumn Edwards, 2024-09-23 The De Gruyter Handbook of Robots in Society and Culture provides a comprehensive discussion of how social robots take form, function, and meaning for individuals, relationships, cultures, and societies. Through a path-breaking integration of perspectives coming from sociology, communication, and media psychology, cognitive neuroscience, anthropology, political science, and science and technology studies, it focuses on the critical and social meaning of present developments in social robotic technologies. This book looks at artificial agents from voice-based assistants to humanoid robots as their use transforms private and public contexts and gives rise to both new possibilities and new perils for human being and becoming, organizations as well as social structures and institutions. The handbook traces the consequences and key problems of social robotics across broad social contexts in both public and political as well as domestic and intimate spaces. Further, it attends carefully to the implications of social robotics for various human identity groups, including those based on gender, ethnicity, culture, class, ability, and age. Deep attention to interdisciplinarity, inclusivity, ethics, and socio-cultural futures serves as the guiding inspiration behind each contribution within this handbook.
