Controlled Open Economies A Neoclassical Approach To Structuralism:

Controlled Open Economies David Bevan, Paul Collier, Jan Willem Gunning, 1990 This book develops macroeconomic theory for small open economies characterized by the sort of controls which make much of existing neoclassical economics inapplicable to developing countries The applicability of this theory is demonstrated in an analysis of two temporary trade shocks in Africa

Controlled Open Economies, 1990 Controlled Open Economies David Bevan, Paul Collier, Jan Gunning, 1990 Examines the reactions of the Kenyan and Tanzanian governments to the large but temporary increase in the price of coffee a major export for both countries

The Relevance of Keynesian Economic Policies Today Philip Arestis, M. Sawyer, 1997-05-13 What can Keynesian economics mean in the 21st century Do globalisation inflationary pressures and supply side constraints make managing demand in a domestic economy impossible Or could its use to tackle unemployment be put back on the political agenda These essays examine the potential relevance of Keynesian policies for Europe America the developing world and the global economy There is no common definition but Keynesianism is throughout seen as more than demand management with policy proposals to promote investment strengthen the supply side and reduce uncertainty

Labour Markets, Poverty, and Development Giorgio Barba Navaretti, Riccardo Faini, Giovanni Zanalda, 1999 As we reach the turn of the millennium the disparity between developed and developing world is of increasing concern Labour Poverty and Development brings together a worldwide mix of contributors from both the academic and practitioner sides of the current debate combining rigorous economic analysis and broader based theorizing to provide a detailed picture of the causes effects and implications of the current situation in the developing world All the contributions stress the vertical relationship between macro trends and micro functionings of markets Part I deals with the interaction between employment and growth and trade policy investigating the positive relationship between growth and employment and the connection between trade liberalization and better working conditions Part II looks at the situation in urban areas the crucial and often hidden role that the informal sector plays in the urban employment market and its connection to the formal labour sector and the collective decision making involved in gender differentials in education Finally Part III investigates the other side of the ruralurban divide with a detailed micro study of labour supply in rural communes in China and an analysis of a common developing world poverty trap the spiralling relationship between destitution and low productivity

Foreign Aid: New Perspectives K. L. Gupta, 2012-12-06 Foreign aid has been an area of active scholarly investigation since the end of the Second World War but particularly since the early 1950s when a large number of the erstwhile colonies became independent Few areas of public policy involving the developed and developing countries have aroused more passion and ideological debate than foreign aid In spite of the massive amount of research in the field there is still not enough work in two areas the first involves the mechanisms through which aid influences the economies of the donor and the recipient countries and the second country specific assessments of the effectiveness of foreign aid Foreign Aid New Perspectives is aimed at making a

contribution in these two areas The contents of this volume are divided into four parts Part I deals with some theoretical aspects of foreign aid while the second part analyzes some general policy aspects Part III turns to the donor experience and includes one paper on the Danish experience The last part considers the recipient experience and consists of five case studies

Sustainable Food Security in West Africa W.K. Asenso-Okyere,E.Y. Benneh,W. Tims,2012-12-06 Food security is defined as the ability of countries regions or households to meet their required levels of food consumption at all times Food security is an important component of human welfare and it can act as an indicator of a region s development This book addresses the roles of trade policy development and economic cooperation in creating sustainable food security in the West African region The largely micro level analysis is conducted on empirical data from the household where decisions on production and consumption take place Food security is discussed in terms of its component parts namely availability of food production and trade its accessibility incomes and poverty status and its utilisation health and nutrition

Economic Crisis in Africa Magnus Blomström,Mats Lundahl,2002-01-22 While the pitiful images of famine victims generally emanate from the very poorest countries in Sub Saharan Africa the entire region faces an intense economic crisis Why is this area in a state of near permanent crisis and perhaps more importantly what can be done about it In *Economic Crisis in Africa* the authors use country studies to examine how this situation has come about The book is divided into four parts Part I presents an overall perspective of the African Crisis and its management Part II addresses the problems of the external sector Part III discusses the crises and structural adjustment from a microperspective and finally Part IV examines changes in economic systems which took place during the 1980s At a time when famine again threatens the area this work offers a valuable insight into a highly complex and critical situation

Foreign Aid, Debt, and Growth in Zambia Per-Åke Andersson,Arne Bigsten,Håkan Persson,2000 A study which discusses the structural problems in Zambia and the policies of adjustment that have been tried It also analyses the impact of various strategies with regard to external resource transfers The results show that the scope for growth is highly dependent on the tightness of the external resource constraint and that debt service tends to dominate the policy making

Economic Change and Political Liberalization in Sub-Saharan Africa Jennifer A. Widner,1994 Aims to establish the nature of the relationship between the economic challenges of the 1980s and the steps toward greater political openness taken by governments at the end of that decade

A General Equilibrium Analysis of Temporary Terms-of-trade Shocks in a Developing Economy Juan Enrique Muñoz Giró,1993 Reviews previous research on the economics of terms of trade booms Develops a general equilibrium model which is applied to the period of the coffee boom from 1975 to 1980 in Costa Rica
