**Addiction** Louise I. Gerdes, 2005 Authors in this newly updated anthology debate controversies surrounding the concept of addiction including what behaviors should be considered addictive what causes addiction what treatments are most effective and whether the government should intervene to reduce the costs associated with addiction **The Impact of a Relationship Skills Training Program on the Communication and Problem Solving Abilities of Individuals in a Male Residential Substance Abuse Treatment Program** Kristin L. Cox Humphrey, 2006 **Alcohol Education** David J. Hanson, 1996-11-30 In spite of a massive national investment in alcohol education the evidence clearly demonstrates that our current efforts are overwhelmingly ineffective and are often counterproductive The assessment of the effectiveness of alcohol programs over the past 15 years reveals that those based on the responsible use approach tend to be superior to those based on the abstinence approach Hanson puts the historical relationship between Americans and alcohol into perspective discusses federal policies on alcohol that are highly ideological and biased and advocates the development of responsible use curricula that will prepare students to be as adults responsible consumers of alcohol While alcohol has been praised as a sign of refinement a source of relaxation and a complement to good times it has also been cursed as the cause of disease and death The temperance movement which taught that alcohol was poison and that moderation in its use was no more possible than moderation in murder has greatly influenced American thought and is reflected in our abstinence oriented approach to alcohol education Current programs reflect not only these abstinence origins but the inclusion of drug education several decades ago Hanson finds that despite good intentions evidence indicates that this approach has proved ineffective He considers the strong and often mixed feelings Americans have toward alcohol that are reflected in ever changing public policy and concludes that the development and evaluation of alcohol education programs should be based on the best scientific evidence available rather than on political ideology Recommendations for change in alcohol education are presented with the most important being that we must promote the development and evaluation of diverse responsible use curricula with the goal of reducing alcohol abuse **Taking Sides**, 1994 *HPER Dimensions*, 1998 *The Effect of Government Warning Labels and Additional Information Sources on Knowledge, Conversations, and Drinking Behavior Among Women If Childbearing Age* Ellen Irish Smith, 1996 Alcohol Health and Research World, 1993 Moderate Drinking Audrey Kishline, 1996 The official handbook of Moderation Management a non profit national self help program that supports moderate drinking as a reasonable and attainable recovery goal for problem drinkers Based on her own

unsatisfactory experience with abstinence based programs Kishline offers inspiration and a step by step program to help individuals avoid the kind of drinking that detrimentally affects their lives **Choice**, 2009 **The Mentally Ill Chemical Abuser** Jacqueline Cohen, Stephen J. Levy, 1992 Mentally ill chemical abusers have long been approached much as the elephant in the proverbial story of the blind men practitioners in the fields of mental health drug abuse and alcohol abuse are apt to examine only the symptoms with which they are most familiar and make diagnoses from those As the blind man holding the elephants tail was certain it was a piece of rope the mental health practitioner faced with a MICA client might see only the mental illness and overlook an equally important need to treat the client's alcohol or drug dependence The MICA population continues to grow for several reasons including an increase in the number of homeless people decreased funding for alcohol drug and mental health treatment mental health hospital deinstitutionalization and the rise in crack use MICA or dually diagnosed clients invariably fall through the cracks of the standard treatment options for mental illness alcohol abuse and drug abuse in large part because the systems often are uncoordinated For example since all use of mood altering substances is forbidden to members of Alcoholics Anonymous an alcohol dependent schizophrenic would have to forego needed medication in order to attend AA meetings At the same time a client who is being treated for alcohol dependence might not find the anticipated lessening of depression after abstinence but may nevertheless be denied access to psychiatric assessment and antidepressant medication In another case psychiatric emergency workers might easily fail to identify drug ingestion as the cause for psychotic episodes in a chronic patient It is not always the fault of misdiagnosis however MICA clients often manipulate mental health and alcohol and drug abuse professionals into fulfilling the need of the moment A MICA client might appear one day as an alcohol abuser the next as a drug addict and the third as a mental patient in order to receive food shelter and clothing **The Mentally Ill Chemical Abuser** is the first book to close the gaps among the three systems and thereby help practitioners understand the complexities that interfere with progressive treatment of the MICA client Cohen and Levy examine assessment issues and treatment planning problems that arise out of inaccurate assessment They also give an integrated view of the client based on their own practical experience and offer solutions to issues associated with the MICA population Any practitioner interested in the correlation between substance abuse and psychopathology will find this book's clear guidelines essential for better serving the mentally ill chemical abusing patient
