of the new pro labor initiatives      *Rivista internazionale di scienze sociali* ,2005      **Electric Shock** Bridget O'Brien,2000  
Book Review Digest ,2002      **Cultural Capital** ,2008\*      The Diversity of Democracy Colin Crouch,Wolfgang  
Streeck,2006 Focusing on the classical literature on neo corporatism this book illustrates the enormous influence of the neo  
corporatist debate on modern political science political sociology and political economy It is aimed at academics students and  
researchers with an interest in political science democratic theory European integration At a time when democratization and  
the state of democracy are at the forefront of attention in many parts of the world this book examines the state of the art on  
this vital political issue Revisiting the now classical literature on neo corporatism in light of current research and theory the  
contributors illustrate the enormous influence of the neo corporatist debate on modern political science political sociology  
and political economy Reflecting on a major part of the recent history of social science they shed light on some of its current  
core concepts such as governance policy networks and varieties of capitalism The book traces the evolution of political  
conflicts concerning social order from the class conflicts in Europe in the of 1970s Europe to the subsequent Latin American  
and Eastern European battles over democratization and democratic transition to the debate on the democratic deficit of the  
European Union      *High Equality, Low Activity* Wolfgang Streeck,2001      *Collective Bargaining, Discrimination, Social  
Security and European Integration* Roger Blanpain,2003 Although nominally protected by a plethora of laws and championed  
in several well intentioned declarations and charters today s worker often feels adrift on an uncharted sea subject to  
unpredictable currents that have nothing to do with the quality of his or her work Can we get at the root of this serious  
problem We can at least determine if our existing legal systems especially in the area of collective bargaining discrimination  
social security and European integration are able and ready to tackle the world of work challenges that confront us And if  
they are not we can begin to formulate a basis for new and effective labour and social security laws This was in fact the  
essential impetus for the European Conference of the International Society of Labour Law and Social Security held in  
Stockholm in September 2002 a ground breaking conference of which this book is the written record In general the papers  
stress the European situation as it is in the EU both as it exists today and as it is likely to be in the foreseeable future a  
community of twenty five nations that the major work challenges are felt and that the legal debate on relevant issues is  
strongest and most open However the twenty four distinguished authors include representatives from countries as far flung  
as Belarus and Congo Korea and Turkey and with these contributions the analysis extends to a study of fundamental rights as  
they actually exist under a wide variety of labour and social security law regimes in today s world Collective Bargaining  
Discrimination Social Security and European Integration should not be overlooked by any policymaker or academic in the  
fields of labour and industrial relations law or social security law It is one of the most detailed and current investigations we  
have of a situation that threatens to become a crisis in contemporary law and society      **The Impact of Globalisation on  
Employment Relations:A Comparison of the Automobile and Banking Industries** Roger Blanpain,Russell D.

Lansbury, Yŏng-bŏm Pak, 2002-07-31 Although no one disputes that employment relations worldwide have been greatly affected by globalisation no clear consensus has emerged on the nature and significance of this impact The seven contributions to this symposium pursue a comparative approach suggesting that direct analysis of employment relations in distinct industries in two comparably sized economies since the advent of globalisation leads to a more precise understanding of the interaction of globalisation and employment relations and sets a pattern for other studies to follow The economies studied in the symposium are Australia and Korea and the industries are automobile and auto parts manufacturing and retail banking In both countries labour unions play a key role in the way in which employers and governments react to political and economic pressures Among the particular topics discussed by the contributors are the following effects of the 1997 financial crisis in Korea the extent to which the automobile industry in one country Korea depends on parts and raw material from another country Australia cross border cooperation between unions the growing trend toward enterprise bargaining conciliation and arbitration of industrial disputes and the role of government sponsored industrial relations commissions The contributing authors are all industrial relations authorities in Australia or Korea The in depth analysis they offer in these very specific areas will be of value to labour lawyers and industrial relations scholars everywhere for the light it sheds on this crucial aspect of contemporary social and economic development
