Conversational Competence And Social Development:

Conversational Competence and Social Development Ioanna Dimitracopoulou,1990 This book provides new insight into the development of the child's ability to become a competent participant in conversation The author combines a pragmatic analysis of the functions language can perform with an innovative and extensive empirical investigation of the development of young children's language use and sociocognitive skills She gives a detailed description of the development of children's language between the ages of three and a half and seven broadens the scope of theorizing about language development by placing it in relation to the development of social understanding and provides a new framework for understanding speech problems and designing ways to solve them It is the first study to find a strong link between language sociocognitive development and social development It will be welcomed by child language specialists developmental and social psychologists conversation and discourse analysts and their advanced students *The Oxford Handbook of Deaf Studies in Learning and Cognition* Marc Marschark,Harry Knoors,2020-04-15 In recent years the intersection of cognitive psychology developmental psychology and neuroscience with regard to deaf individuals has received increasing attention from a variety of academic and educational audiences Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn how signed languages and spoken languages might affect different aspects of cognition and cognitive development and the ways in which hearing loss influences how the brain processes and retains information There are now a number of preliminary answers to these questions but there has been no single forum in which research into learning and cognition is brought together The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum focusing exclusively on learning cognition and cognitive development from theoretical psychological biological linguistic social emotional and educational perspectives Each chapter includes state of the art research conducted and reviewed by international experts in the area Drawing this research together this volume allows for a synergy of ideas that possesses the potential to move research theory and practice forward

Late-Talking Children, revised and expanded edition Stephen M. Camarata,2025-05-20 A revised and expanded edition of the bestselling guide to late talking children for parents clinicians and educators from a leading authority on development and disabilities Every year in America more than half a million parents of late talking children face agonizing questions What should I do if my two or even three year old has not yet begun to talk Should I worry that my child is autistic or intellectually disabled Are expensive therapies or medications needed Will my child ever speak normally In this revised and expanded edition of the essential resource on the subject Late Talking Children Stephen Camarata the parent of a late talking child and a late talker himself provides clear sensible and compassionate answers for parents clinicians and educators drawing on his more than three decades of experience diagnosing and treating the late talking syndrome as well as the best science available today **The Theory of Deliberative Wisdom** Eric Racine,2025-05-13 From a leading ethicist a workable and

inspiring model of ethics showing not only why ethics matters but also how it can be used to improve human welfare

Humanity faces a multitude of profound challenges at present technological advances environmental changes rising inequality and deep social and political pluralism These transformations raise moral questions questions about how we view ourselves and how we ought to engage with the world in the pursuit of human flourishing In *The Theory of Deliberative Wisdom* Eric Racine puts forward an original interdisciplinary ethics theory that offers both an explanation of the workings of human morality and a model for deliberation based imaginative processes to tackle moral problems Drawing from a wide array of disciplines such as philosophy psychology sociology political science neuroscience and economics this book offers an engaging account of situated moral agency and of ethical life as the pursuit of human flourishing Moral experience Racine explains is accounted for in the form of situational units morally problematic situations These units are in turn theorized as actionable and participatory building blocks of moral existence mapping to mechanisms of episodic memory and to the construction of personal identity Such explanations pave the way for an understanding of the social and psychological mechanisms of the awareness and neglect of morally problematic situations as well as of the imaginative ethical deliberation needed to respond to these situations Deliberative wisdom is explained as an engaged and ongoing learning process about human flourishing
