Controlling Access to Content Natali Helberger, 2005-01-01 Control of access to content has become a vital aspect of many business models for modern broadcasting and online services Using the example of digital broadcasting the author reveals the resulting challenges for competition and public information policy and how they are addressed in European law governing competition broadcasting and telecommunications Controlling Access to Content explores the relationship between electronic access control freedom of expression and functioning competition It scrutinizes the interplay between law and technique and the ways in which broadcasting telecommunications and general competition law are inevitably interconnected New Media and Sport Katrien Lefever, 2012-10-04 During the past decade the media landscape and the coverage of sports events have changed fundamentally Sports fans can consume the sports content of their choice on the platform they prefer and at the time they want Furthermore thanks to electronic devices and Internet content can now be created and distributed by every sports fan As a result it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant Moreover it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law This book illustrates that media law is still needed even in an era of abundance to guarantee public s access to live and full sports coverage Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines such as legal and public policy political science media and communications studies journalism and European studies Additionally it contains valuable information and points of view for policy makers lawyers and international and intergovernmental organisations active in media development The book contains an up to date analysis and overview of the different competition authorities decisions and media provisions dealing with the sale acquisition and exploitation of sports broadcasting rights Katrien Lefever is Senior Legal Researcher at IBBT The Interdisciplinary Centre for Law and ICT ICRI KU Leuven Belgium The book appears in the ASSER International Sports Law Series under the editorship of Prof Dr Robert Siekmann Dr Janwillem Soek and Marco van der Harst LL M
