Conversational Coherence Robert T. Craig, Karen Tracy, 1983 *Interactive Dialogue Sequences in Middle English Drama* Gabriella Mazzon, 2009 This book looks at mediaeval English drama using the theoretical frameworks of historical sociopragmatics and dialogue analysis It focuses on the collection of cycle plays known as the N Town Plays preserved in a manuscript from the fifteenth century The book examines various linguistic markers that are important for the expression of social relations and pragmatic stance pronouns and terms of address modal markers performatives and sequential structures such as question answer imperative compliance etc These elements are examined separately and then brought together to arrive at a more integrated analysis of dramatic dialogue and of the dynamics of interaction it portrays A separate chapter is devoted to tracing the same mechanisms on a different communication level i e in dialogue with the audience which is particularly relevant to the instructional purposes of the plays The book will be useful to students and scholars of pragmatics historical linguistics dialogue studies and drama studies *Relational Being* Kenneth J. Gergen, 2009-07-30 This book builds on two current developments in psychology scholarship and practice The first centers on broad discontent with the individualist tradition in which the rational agent or autonomous self is considered the fundamental atom of social life Critique of individualism spring not only from psychologists working in the academy but also from communities of therapy and counseling The second and related development from which this work builds is the search for alternatives to individualist understanding Thus therapists such as Steve Mitchell along with feminists at the Stone Center expand the psychoanalytic tradition to include a relational orientation to therapy The present volume will give voice to the critique of individualism but its major thrust is to develop and illustrate a far more radical and potentially exciting landscape of relational thought and practice that now exists Most existing attempts to build a relational foundation remain committed to a residual form of individualist psychology The present work carves out a space of understanding in which relational process stands prior to the very concept of the individual More broadly the book attempts to develop a thoroughgoing relational account of human activity In doing so Gergen reconstitutes the mind as a manifestation of relationships and bears out these ideas in a range of everyday professional practices including family therapy collaborative classrooms and organizational psychology
