Dynamic Competition And Public Policy Technology Innovation And Antitrust Issues:

Dynamic Competition and Public Policy Jerome Ellig, 2001-04-23 Scholars explore antitrust issues as these relate to dynamic industry competition and public policy *Intellectual Property and Antitrust* Mariateresa Maggolino, 2011-01-01 This book brings to bear Professor Maggolino's considerable skills as a comparative competition law scholar on what is perhaps the single most important competition policy issue facing us today namely how to use IP policy and competition policy in tandem to further both economic competition and competition in innovation Professor Maggolino's book covers a large range of IP practices by dominant firms where competition law can be invoked including sham litigation and product design improper infringement actions predation and refusals to license This book is well researched well written and completely up to date Every serious competition law antitrust and intellectual property scholar and practitioner should regard it as must reading

Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement

Expanding Competition in Regulated Industries Michael A. Crew, 2013-03-09 Expanding Competition in Regulated Industries reviews the changing regulatory environment notably incentive regulation and competition in regulated industries Some of the major changes in electricity gas and telephone utilities allow for competition in local service through unbundling This book is of interest to researchers utility managers regulatory commissions and the Federal Government

Firm Dominance in EU Competition Law Jorge Marcos Ramos, 2020-02-20 How does it come about that a certain firm dominates a market Can an understanding of this process lead to a more effective enforcement of competition law That is the question approached in this compelling book The author reviews the European Union's EU's Article 102 case law comparing it with United States US provisions demonstrating that new ways of looking at market power are needed today's tech giants differ from older monopolies He clarifies the role of

dominant firms in the competitive process proposing that conduct should be scrutinized differently depending on the source of market power rather than using the same approach for all dominant undertakings. Supporting his contention that the legal consequences that derive from holding a dominant position cannot be disassociated from the sources of that market power, that a dynamic understanding of dominance requires looking both forwards and backwards in time, the author examines such sources of dominance as the following: statutory dominance derived from explicit protectionist measures or subtler geoeconomic strategies; legacy firms such as the telecommunications or transport industries; natural monopolies e.g. the exploitation of a mine; investment efforts undertaken in a competitive environment; intangible resources such as timing, reputation, experience, innovation capabilities or managerial processes; lucky monopolies and anticompetitive behavior on the road to dominance. Drawing insights from EU and US case law, industrial organization scholarship and strategic management literature, the book resolves questions related to the role that the origins of market power have played and should play in the enforcement of EU competition rules against dominant firms. It concludes with a list of policy recommendations bringing the application of Article 102 TFEU against dominant firms more in line with the objective of protecting the competitive process. With its focus on how EU competition law enforcement should be fine-tuned to adequately incorporate the origins of firm dominance into the analysis of single firm behavior, the book makes a major contribution to the analysis of anticompetitive effects. Practitioners, competition authorities and academics in competition law will greatly appreciate the book's combination of legal analysis and recommendations for policy reform.

Issues in Competition Law and Policy: Jurisprudence, 2008. This massive 3 volume hardcover examination of the history, design and enforcement of competition law is for judges, enforcement officials, lawyers and economists: anyone who wishes to understand the jurisprudential, substantive and methodological issues confronting modern competition law and policy. The authors of this book include policy makers, academics, economists and lawyers from across the globe, ensuring a variety of perspectives and approaches on competition law and policy.

European Competition Law Annual 2005, Claus-Dieter Ehlermann, Isabela Atanasiu, 2007-03-12. This is the tenth in a series of volumes based on the annual workshops on EU Competition Law and Policy held at the Robert Schuman Centre of the European University Institute in Florence. The volume reproduces the materials of the roundtable debate which examined the interaction between competition law and intellectual property law. The workshop participants, a group of senior representatives of the Commission and the national competition authorities of some EC Member States, renowned international academics and legal practitioners, discussed the economic and legal issues that arise in this particular area of application of the EC competition rules under the following headings: 1. whether the characteristics of intellectual property products/markets justify special treatment under the competition rules; 2. a critical assessment of the Block Exemption Regulation and corresponding Guidelines recently adopted in this area of EC competition law enforcement; 3. the specific enforcement issues that arise in relation to patent pools and collecting societies; and 4. specific problems related to IP in the
