Ziermann, 1987 This IFAC symposium considers the modelling analysis and control of various economic and socio economic systems The volume is divided into three sections covering economic theory macroeconomic policymaking national sectoral and regional models mathematical algorithmical and computational methods of modelling giving a clear and concise view of the use of computer systems in the world of economics

*Analysis, Design and Evaluation of Man-Machine Systems 1989* B. Hu, 2014-05-23 The twenty seven papers cover recent advances in both empirical and theoretical aspects of man machine interaction with special emphasis on the subjects of man automation and man computer interaction They provide information on a subject which has grown rapidly in importance during recent years

*Dynamic Modelling and Control of National Economies, 1989* Nicos M. Christodoulakis, 1990 The Symposium aimed at analysing and solving the various problems of representation and analysis of decision making in economic systems starting from the level of the individual firm and ending up with the complexities of international policy coordination The papers are grouped into subject areas such as game theory control methods international policy coordination and the applications of artificial intelligence and experts systems as a framework in economic modelling and control The Symposium therefore provides a wide range of important information for those involved or interested in the planning of company and national economics

*International Conflict Resolution Using System Engineering (SWIS)* H. Chestnut, T. Vámos, Peter Kopacek, 2014-07-04 Finding an alternative to supplement military ways of resolving international conflicts has been taken up by many people skilled in various areas such as political science economics social studies modelling and simulation artificial intelligence and expert systems military strategy and weaponry as well as private business and industry The Workshop will therefore be of

use as it looks at various control methods which would create a conciliatory social and political environment or climate for seeking and obtaining non military solutions to international conflicts and to solutions to national conflicts which may lead to international conflicts

Economics and Artificial Intelligence Jean-Louis Roos,2014-05-09 Economics and Artificial Intelligence documents the proceedings of the IFAC IFORS IFIP IASC AFCET Conference held in Aix en Provence France on September 2 4 1986 This book discusses the design of intelligent dialogue in D S S qualitative modeling of economic studies basic propositions for intelligent systems design methods and expert systems for confirmatory data analysis The artificial intelligence for transaction cost economizing knowledge based evaluation of strategic investments and reasoning system for the guidance of technological transfer are also elaborated This text likewise covers the A I impacts on the process of the division of labor using automated techniques to generate expert systems for R and intelligent support to decision making process This compilation is a good reference for students and researchers conducting work on the nature of economics and artificial intelligence

*Expert Systems in Mineral and Metal Processing* A. J. Niemi,S.L. Jamsa-Jounela,2016-09-01 Within the metal and mining industries the use of expert systems for monitoring and control is on the increase The content of each paper had to include both expert systems neural networks or fuzzy control The papers were evenly contributed from industry universities and research institutes thus this book provides a valuable insight into the theoretical as well as the practical applications currently in use within the industry

*Model Error Concepts & Compensation* R.E. Skelton,D.H. Owens,2014-06-28 Presents a state of the art review of model error concepts their characterization and compensation in estimation and control problems with particular emphasis on error propagation model order selection performance guarantees sensitivity and adaptive methods Main topics covered include linear and nonlinear systems identification robotics computer aided design signal processing computers and communication in control automation and real time control of processes

**Automation and Instrumentation for Power Plants** M. Ramamoorthy,2016-01-22 An analysis of power systems control hardware modelling and simulation instrumentation and computers and distributed systems The stability of plants and their interaction in a multi machine system is also discussed as well as an analysis of the values of LOFT ATWS EVENT for PWR and the new algorithm of on line ELD for thermal power plants

**Power Systems and Power Plant Control, 1989** Uhi Ahn,1990 The control of power systems and power plants is a subject of growing interest which continues to sustain a high level of research development and application in many diverse yet complementary areas such as maintaining a high quality but economical service and coping with environmental constraints The papers included within this volume provide the most up to date developments in this field of research
