**Dynamic Models of Oligopoly** Jean Tirole, 1986      **Dynamic Models of Oligopoly** D. Fudenberg, J. Tirole, 2013-06-17

Fudenberg and Tirole use the game theoretic issues of information commitment and timing to provide a realistic approach to oligopoly

The Theory of Industrial Organization Jean Tirole, 1988-08-26 The Theory of Industrial Organization is the first primary text to treat the new industrial organization at the advanced undergraduate and graduate level Rigorously analytical and filled with exercises coded to indicate level of difficulty it provides a unified and modern treatment of the field with accessible models that are simplified to highlight robust economic ideas while working at an intuitive level To aid students at different levels each chapter is divided into a main text and supplementary section containing more advanced material Each chapter opens with elementary models and builds on this base to incorporate current research in a coherent synthesis Tirole begins with a background discussion of the theory of the firm In Part I he develops the modern theory of monopoly addressing single product and multi product pricing static and intertemporal price discrimination quality choice reputation and vertical restraints In Part II Tirole takes up strategic interaction between firms starting with a novel treatment of the Bertrand Cournot interdependent pricing problem He studies how capacity constraints repeated interaction product positioning advertising and asymmetric information affect competition or tacit collusion He then develops topics having to do with long term competition including barriers to entry contestability exit and research and development He concludes with a game theory user's manual and a section of review exercises Important Notice The digital edition of this book is missing some of the images found in the physical edition

**The Economics of Order and Disorder** Jacques Lesourne, 1992 This book addresses some basic questions in economics all of which have a common core they all refer to forming behaviour to the emergence of order its adaptation its transformation and its ultimate dissolution into chaos Starting with the notion of self organization the author analyses the operation and the demise of institutions in economics In doing so he takes into account the consequences of the intervention of history chance necessity and will a subject little undertaken in contemporary economic theory Starting with the theory of microeconomics itself the author builds precise models based on explicit hypotheses and draws out the significance of the propositions obtained The book draws on systems theory evolutionary theory the literature on institutional economics and existing general equilibrium theory and steps outside the present conceptual framework of microeconomics

**Dynamic Models of Oligopoly** Drew Fudenberg, Jean Tirole, 2002 Fudenberg and Tirole use the game theoretic issues of information commitment and timing to provide a realistic approach to oligopoly
