Graeme Snooks

Dynamic Society Exploring The Sources Of Global Change:

The Dynamic Society Graeme Snooks, 2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought provoking and controversial conclusions

The Oxford Handbook of Evolution, Biology, and Society Dr. Rosemary Hopcroft, 2018-03-09 Evolution biology and society is a catch all phrase encompassing any scholarly work that utilizes evolutionary theory and or biological or behavioral genetic methods in the study of the human social group and The Oxford Handbook of Evolution Biology and Society contains an much needed overview of research in the area by sociologists and other social scientists The examined topics cover a wide variety of issues including the origins of social solidarity religious beliefs sex differences gender inequality determinants of human happiness the nature of social stratification and inequality and its effects identity status and other group processes race ethnicity and race discrimination fertility and family processes crime and deviance and cultural and social change The scholars whose work is presented in this volume come from a variety of disciplines in addition to sociology including psychology political science and criminology Yet as the essays in this volume demonstrate the potential of theory and methods from biology for illuminating social phenomena is clear and sociologists stand to gain from learning more about them and using them in their own work The theory focuses on evolution by natural selection the primary paradigm of the biological sciences while the methods include the statistical analyses sociologists are familiar with as well as other methods that they may not be familiar with such as behavioral genetic methods methods for including genetic factors in statistical analyses gene wide association studies candidate gene studies and methods for testing levels of hormones and other biochemicals in blood and saliva and including these factors in analyses This work will be of interest to any sociologist with an interest in exploring the interaction of biological and sociological processes As an introduction to the field it is useful for teaching upper level or graduate students in sociology or a related social science

The Laws of History Graeme Snooks, 2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature

After the Soviet Empire, 2015-10-05 The break up of the Soviet Union is a key event of the twentieth century The 39th IIS congress in Yerevan 2009 focused on causes and consequences of this event and on shifts in the world order that followed in its wake This volume is an effort to chart these developments in empirical and conceptual terms It has a focus on the lands of the former Soviet Union but also explores pathways and contexts in the Second World at large The Soviet Union was a full scale experiment in creating an alternative modernity The implosion of this union gave rise to new states in search of national identity At a time when some observers heralded the end of history there was a rediscovery of historical legacies and a search for new paths of development across the former Second World In some parts of this world long repressed

legacies were rediscovered They were sometimes as in the case of countries in East Central Europe built around memories of parliamentary democracy and its replacement by authoritarian rule during the interwar period Some legacies referred to efforts at establishing statehood in the wake of the First World War others to national upheavals in the nineteenth century and earlier In Central Asia and many parts of the Caucasus the cultural heritage of Islam in its different varieties gave rise to new markers of identity but also to violent contestations In South Caucasus Georgia Armenia and Azerbaijan have embarked upon distinctly different but invariably contingent paths of development Analogously core components of the old union have gone through tumultuous but until the last year and a half largely bloodless transformations The crystallization of divergent paths of development in the two largest republics of that union i e Russia and Ukraine has ushered in divergent national imaginations but also in series of bloody confrontations

The Ephemeral Civilization Graeme Snooks, 2002-09-11 The Ephemeral Civilization is an astonishing intellectual feat in which Graeme Snooks develops an original and ground breaking analysis of changing sociopolitical forms over the past 3 000 years Snooks challenges the prevailing theories of social evolutionism with an innovative approach which also looks ahead to the twenty first century The Ephemeral Civilization builds on the model of dynamic strategy outlined in the author s highly acclaimed companion volume The Dynamic Society The Ephemeral Society is divided into three parts theory history and future

Encyclopedia of Global Environmental Change, Set Ted Munn, Michael C. MacCracken, John S. Perry, Harold A. Mooney, Josep G. Canadell, Ian Douglas, Mostafa K. Tolba, Peter Timmerman, 2002 THE DEFINITIVE RESOURCE The Encyclopedia of Global Environmental Change is the first major reference work in this multi disciplinary field and presents Outstanding authorship and high quality editing Comprehensive coverage with over 3 800 pages in 5 volumes Over 500 articles 100 biographies 150 definitions and 100 acronyms Extensive bibliographies with up to date references ABOUT THE ENCYCLOPEDIA The Wiley Encyclopedia of Global Environmental Change has been published to meet the need for a comprehensive integrated reference in this burgeoning field It consists of five volumes of inter related material Volume 1 The Earth System Physical and Chemical Dimensions of Global Environmental Change Volume 2 The Earth System Biological and Ecological Dimensions of Global Environmental Change Volume 3 Causes and Consequences of Global Environmental Change Volume 4 Responding to Global Environmental Change Volume 5 Social and Economic Dimensions of Global Environmental Change Each volume contains articles of between 1 000 and 10 000 words on major topics Articles contain an abstract written for the non specialist followed by the main text which provides greater detail for the specialist Biographies of distinguished environmental scientists discuss their contributions to a better understanding of global environmental change Definitions of international terms and descriptions of acronyms of international and regional programs and agencies provide a quick reference source for the environmental scientist and student Presents a thematic approach and includes theory empirical studies and applications emphasising the inter relationship between various disciplines and systems

Social Evolution & History, 2007

Review - Fernand Braudel Center for the Study of Economies, Historical Systems, and Civilizations Fernand Braudel
Center for the Study of Economies, Historical Systems, and Civilizations, 2002 IABSE Conference, New Delhi, India 2005
, 2005 **Re Orient** Aat Emile Vervoorn, 2005 Publisher description **Landscapes, Documents and Maps** Brian K.
Roberts, 2008 The last half century has seen many studies of the origin of the English village As a cross disciplinary enquiry
this book integrates materials from geography history economic history archaeology place name studies anthropology and
even church architecture These provide varied foundations but the underlying subject matter always engages with landscape
studies Beginning with a rigorous examination of evidence hidden within the surviving village and hamlet plans seen on
eighteenth and nineteenth century maps the first half of the book shows how these can be classified mapped analysed and
then interpreted as important parts of former medieval landscapes Many specific case studies are built into the argument all
being drawn from the author's lifetime work on northern England and accessible language is employed From this base the
argument develops with the objective of integrating landscape studies with the descriptive and analytical practices of history
and drawing these together by using the cartographic methods of historical geography This foundation leads gently into
deeper waters to the landed estates in which all settlements developed and the farming and social systems of which they
were a part to the land holding arrangements that were integrated into the physical plans providing methods of sharing out
the agricultural resources of arable meadow woodland and common grazings and finally to the social divisions present within
a changing society A wholly new theme is found in the argument that certain types of land tenure were associated with a
class of officer land agent or dreng who in northern England was often linked with the provision of tenants for new villages It
is clear from the evidence amassed that the deliberate founding of new villages and the establishment of new plans on older
sites was taking place in the centuries between about AD 900 and 1250 Finally the study moves beyond the North of England
to review the European roots of planned villages and hamlets and concludes with a challenging hypothesis about their origin
in the whole of England This provides pointers towards future enquiry **The Selfcreating Mind** Graeme Donald
Snooks, 2007 In this ambitious and imaginative work noted social and biological theorist Graeme Donald Snooks explores the
origin development and role of the self conscious mind The Selfcreating Mind which displaces the mind hypothesized by
psychoanalytic Darwinian and complexity theorists provides a new perspective on human nature the origin nature and
purpose of the self conscious mind the reasons for its continuing breakdown in a significant minority of the population and on
the surest road to mental recovery **Globally and Locally** Alan G. McQuillan, Ashley L. Preston, 1998-06-23 Globally and
Locally tackles the economic difficulties of succeeding in a world that is increasingly global while surviving on the local level
It brings together the ideas of several scholars on the political and economic strategies to follow in the modern global market
The editors examine the United States Scotland and Japan on the corporate community and regional levels and make
recommendations to improve the present economic structures without completely replacing them Each concept focuses on

the unique goal of charting a middle path that binds theory with practice culture with nature economy with ecology and the global with the local A strategy is devised for global success without neglecting matters such as culture the environment small towns or rural areas

The American Economic Review, 1996 Includes papers and proceedings of the annual meeting of the American Economic Association Covers all areas of economic research **Living Economic and Social History** Economic History Society, 2001 **Agricultural Development in a Frontier Region of Java** S. Nawiyanto, 2003

History Behind the Headlines, 2003 Provides background information on long term ethnic religious political territorial and economic conflicts between nations today Strategic Demand and the Growth-inflation Curve Graeme Donald

Snooks, 1997 The Evolution of Human Sociality Stephen K. Sanderson, 2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these

disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory Europe in the International Economy, 1500 to 2000 Derek Howard Aldcroft, Anthony Sutcliffe, 1999 A survey of the European economy from 1500 to 2000 It explains why Europe overtook the formerly advanced Eastern civilizations and how it influenced the rest of the world It also compares Europe's position of world dominance in the 19th century with its vacillating fortunes in the 20th century
