Dynamics Of Crowdminds Patterns Of Irrationality In Emotions Beliefs And Actions:

Dynamics Of Crowd-minds: Patterns Of Irrationality In Emotions, Beliefs And Actions Andrew Adamatzky, 2005-05-30 A crowd mind emerges when formation of a crowd causes fusion of individual minds into one collective mind Members of the crowd lose their individuality The deindividuation leads to derationalization emotional impulsive and irrational behavior self catalytic activities memory impairment perceptual distortion hyper responsiveness and distortion of traditional forms and structures This book presents unique results of computational studies on cognitive and affective space time processes in large scale collectives of abstract agents being far from mental equilibrium Computational experiments demonstrate that the irrational and nonsensical behavior of individual entities of crowd mind results in complex rich and non trivial spatio temporal dynamics of the agent collectives Mathematical methods employ theory and techniques of cellular automata and lattice swarms applied algebra theory of finite automata and Markov chains and elementary differential equations *Dynamics of Crowd-minds* Andrew Adamatzky, 2005 Includes easily accessible discrete models cellular automata artificial chemistry a great number of informative illustrations enlightening quotations and an encyclopedic list of references Models and paradigms developed in the book can be applied to mathematical studies of affective collective intelligence computational models of minds near the state of mental disorder the design of massive parallel prototypes of artificial consciousness software implementations of affective cognition and the design of hardware prototypes of emotional controllers *Dynamics of Crowd-minds* Andrew Adamatzky, 2005 *Handbook of Environmental Fluid Dynamics, Volume One* Harindra Joseph Fernando, 2012-12-12 With major implications for applied physics engineering and the natural and social sciences the rapidly growing area of environmental fluid dynamics focuses on the interactions of human activities environment and fluid motion A landmark for the field the two volume Handbook of Environmental Fluid Dynamics presents the basic principles fundamental flow processes modeling techniques and measurement methods used in the study of environmental motions It also offers critical discussions of environmental sustainability related to engineering The handbook features 81 chapters written by 135 renowned researchers from around the world Covering environmental policy biological and chemical aspects it tackles important cross disciplinary topics such as sustainability ecology pollution micrometeorology and limnology Volume One Overview and Fundamentals provides a comprehensive overview of the basic principles It starts with general topics that emphasize the relevance of environmental fluid dynamics research in society public policy infrastructure quality of life security and the law It then discusses established and emerging focus areas The volume also examines the sub mesoscale flow processes and phenomena that form the building blocks of environmental motions with emphasis on turbulent motions and their role in heat momentum and species transport As communities face existential challenges posed by climate change rapid urbanization and scarcity of water and energy the study of environmental fluid dynamics becomes increasingly relevant This volume is a valuable resource for students researchers and policymakers

Multiscale Modeling of Pedestrian Dynamics Emiliano Cristiani, Benedetto Piccoli, Andrea Tosin, 2014-09-12 This book presents mathematical models and numerical simulations of crowd dynamics The core topic is the development of a new multiscale paradigm which bridges the microscopic and macroscopic scales taking the most from each of them for capturing the relevant clues of complexity of crowds The background idea is indeed that most of the complex trends exhibited by crowds are due to an intrinsic interplay between individual and collective behaviors The modeling approach promoted in this book pursues actively this intuition and profits from it for designing general mathematical structures susceptible of application also in fields different from the inspiring original one The book considers also the two most traditional points of view the microscopic one in which pedestrians are tracked individually and the macroscopic one in which pedestrians are assimilated to a continuum Selected existing models are critically analyzed The work is addressed to researchers and graduate students

Language, Culture, Computation: Computing for the Humanities, Law, and Narratives Nachum Dershowitz, Ephraim Nissan, 2014-12-04 This Festschrift volume is published in Honor of Yaacov Choueka on the occasion of this 75th birthday The present three volumes liber amicorum several years in gestation honours this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours Yaacov's research has had a major impact not only within the walls of academia but also in the daily life of lay users of such technology that originated from his research An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s a project in which he is currently involved is proving to be a sensation as will become apparent from what follows Yaacov Choueka began his research career in the theory of computer science dealing with basic questions regarding the relation between mathematical logic and automata theory From formal languages Yaacov moved to natural languages He was a founder of natural language processing in Israel developing numerous tools for Hebrew He is best known for his primary role together with Aviezri Fraenkel in the development of the Responsa Project one of the earliest fulltext retrieval systems in the world More recently he has headed the Friedberg Genizah Project which is bringing the treasures of the Cairo Genizah into the Digital Age This second part of the three volume set covers a range of topics related to the application of information technology in humanities law and narratives The papers are grouped in topical sections on humanities computing narratives and their formal representation history of ideas the numerate disciplines law computer law and legal computing

Computer Applications for Handling Legal Evidence, Police Investigation and Case Argumentation Ephraim Nissan, 2012-06-15 This book provides an overview of computer techniques and tools especially from artificial intelligence AI for handling legal evidence police intelligence crime analysis or detection and forensic testing with a sustained discussion of methods for the modelling of reasoning and forming an opinion about the

evidence methods for the modelling of argumentation and computational approaches to dealing with legal or any narratives By the 2000s the modelling of reasoning on legal evidence has emerged as a significant area within the well established field of AI Law An overview such as this one has never been attempted before It offers a panoramic view of topics techniques and tools It is more than a survey as topic after topic the reader can get a closer view of approaches and techniques One aim is to introduce practitioners of AI to the modelling legal evidence Another aim is to introduce legal professionals as well as the more technically oriented among law enforcement professionals or researchers in police science to information technology resources from which their own respective field stands to benefit Computer scientists must not blunder into design choices resulting in tools objectionable for legal professionals so it is important to be aware of ongoing controversies A survey is provided of argumentation tools or methods for reasoning about the evidence Another class of tools considered here is intended to assist in organisational aspects of managing of the evidence Moreover tools appropriate for crime detection intelligence and investigation include tools based on link analysis and data mining Concepts and techniques are introduced along with case studies So are areas in the forensic sciences Special chapters are devoted to VIRTOPSY a procedure for legal medicine and FLINTS a tool for the police This is both an introductory book possibly a textbook and a reference for specialists from various quarters
