- **Organizational Culture:** The shared values, norms, and beliefs that shape behavior and guide decision-making.
- **Leadership Styles:** The approaches and behaviors of leaders in influencing and motivating others.
- **Group Dynamics:** The interactions and relationships within teams and workgroups, including communication patterns and conflict resolution.
- **Change Dynamics:** How the organization responds to and manages change, including resistance and adaptation.

Organization Development Janet Cooper Jackson, 2006 This work addresses the human and social dynamics of change on organization members The effects of such changes ultimately influence the success or failure of the organization s change initiatives Rather than focus on the process or technology of change as many previous works have done the premise of this work is to address the human dynamics that are crucial for any change initiative to be effective In essence Jackson emphasizes that people do indeed come first for any plan involving organizational change Other important factors addressed in Organizational Development include considering the entire organization and understanding that each change affects the entity as a whole recognizing organizational learning as a key to inspiring members to learn together and the development of a cadre of leaders who are willing to take the organization forward as opposed to solitary leadership This work is ideal for students or practitioners of Organization Development OD and provides methods and practices that focus on improving the effectiveness of organizations
