no doubt be a useful resource for entrepreneurs and managers looking to ride out the key challenges and emerge as survivors

ICA 2019 Sri Hastjarjo, Dorien Kartikawangi, Loina Lalolo Krina Perangin-angin, Kundharu Saddhono, Robbi Rahim, 2021-02-08 The advance technological development has led to the revolution on the way people communicating People things and systems now are all connected in cyberspace and optimal results obtained by artificial intelligence AI exceeding the capabilities of humans fed back to physical space This process brings new value to industry and society in ways not possible previously To explore and examine it the proceedings comprise themes 1 communication industry and beyond that focused on the concept of personalization to the next level of mass personalization in the communication fields 2 social cultural and its implications that explore communities based on interest religion or shared identify to achieve a forward looking society whose members have mutual respect for each other transcending the generations and lead an active and enjoyable life 3 the digitization of content that focuses on the process of converting information into a digital format where the big data becomes the central of this area that make easier to preserve access and share information to people worldwide but implied by the competencies and ethics 4 governance politics and good public governance that explore the way public control others and participate to all governance related activities for encouraging transparency and public accountability politics and democracy 5 entrepreneurship that focuses on the endorsement of technological based innovation that give opportunity to create and develop an initiative effected to society from a scale up start up to a global level or become a social entrepreneur using the technology as a place to break a social change and 6 special issues exploring interests in global regional national and local level

Moral design and technology Bart Wernaart, 2023-08-14 When should a surveillance system that is used in preventive policing sacrifice the privacy of citizens to prevent criminality What should be the impact of individual moral expectations when a social media platform designs an algorithm To what degree can we use technology driven deception in dementia care practices And can we create a moral compass for a dashboard society Over the last decade the impact of technological innovation has been unprecedented It has profoundly changed the way we participate and interact in society It has also led to new moral challenges Not only because of the technology itself but also because this technology is used in the context of a globalised world with a more prominent role for the private sector This can result in moral confusion individuals who alternately assume the role of citizen and consumer feel unable to influence the design of technology that has a strong impact on their core values Sustaining this moral confusion is in nobody s long term interest In this book we propose to overcome this moral confusion by using a bottom up design approach that incubates ethics when constructing new technologies This book is composed of four parts In the first part we focus on how to integrate moral decisions and morality in the design process of new technology In the second part we assess how moral design relates to related discourse including business ethics law and policy In the third part of this book various case studies are highlighted that focus on particular moral design issues at the crossroads of technological innovation in the public and private sector In

the last part we look ahead and discuss what the future might look like if we use moral design as a central approach in creating new technology This book is relevant for IT and engineering professionals business leaders and policymakers with innovation in their portfolios and students of applied science who are interested in the moral design of technology The chapters are written by experts and leading researchers in an attractive accessible and practical writing style Each chapter offers colourful examples and challenges the reader to critically think through moral decision making and the design of innovation See also the inaugural speech of Bart Wernaart on Moral Designs on YouTube
