**Christina L. Littlefield**

## **Cambridge Social History Of Britain 1750 1950 Vol 1 Regions And Communities:**

**A Companion to Nineteenth-Century Britain** Chris Williams, 2008-04-15 A Companion to Nineteenth Century Britain presents 33 essays by expert scholars on all the major aspects of the political social economic and cultural history of Britain during the late Georgian and Victorian eras Truly British rather than English in scope Pays attention to the experiences of women as well as of men Illustrated with maps and charts Includes guides to further reading *The Cambridge Social History of Britain, 1750-1950* F. M. L. Thompson, 1992-11-19 Volume Two explores the questions of social structure social mobility and class relations Family and household the social implications of demographic change jobs working and housing conditions and family relations were all crucial elements in the shaping of group consciousness these form the main themes of this volume With chapters on nutrition patterns of food and drink consumption and leisure activities a comprehensive overview is built up on the way the social order has been changed **North East England, 1850-1914** Graeme J. Milne, 2006 The development of the coalfield and the riparian manufacturing districts moulded new industrial landscapes the growth of ports and conurbations demanded innovative approaches to government and administration and the business strategies of North East entrepreneurs challenged conventional boundaries The author concludes that riverside districts on the Tyne Tees and Wear represented more viable working horizons than any regional North East in this era and raises important questions about the study of the English regions in their historical context Jacket Beyond the Reproductive Body Marjorie Levine-Clark, 2004 Investigates the politics of women's health and work in early Victorian England where government officials and reformers surveying the laboring population became convinced that the female body would be ruined by employment **Regional Dynamics** William Field, 2013-01-11 There is a perceived North South divide in British politics In this study William Field points out that this divide marks the resurgence of a core periphery cleavage which was also dominant in British politics in the years before 1914 Other similarities are pointed out Chosen Nations Christina L. Littlefield, 2013-09-01 At the heart of the biblical myth of chosenness is the idea that God has blessed a people to be a blessing to others It is a mission of solemn responsibility The six British and American thinkers examined in this study embraced the myth of chosenness for their countries believed that the liberties they enjoyed were inherently tied to their Protestant faith and that it was their mission to protect and spread that faith and its democratic fruit at home and abroad **The Cambridge Social History of Britain, 1750-1950** F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians have had no difficulty in finding their subject The difficulty rather is that the advance has occurred through such an outpouring of research and writing that it is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of recent monographic research and presented an interpretation of the development of modern British society since 1750 from three complementary perspectives those of

regional communities of the working and living environment and of social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

**Royal Historical Society Annual Bibliography of British and Irish History** Gerald K. Helleiner,1991-10 The Royal Historical Society's Annual Bibliography provides a comprehensive and authoritative survey of books and articles on historical topics published in a single calendar year It is divided into sections covering British and Irish history from Roman Britain to the present day and is arranged alphabetically

Roman Catholic Nuns in England and Wales, 1800-1937 Barbara Walsh,2002 There is still considerable ignorance about the life and work of female religious communities in England and Wales The influence of women who developed professional careers in education health and social care while at the same time dedicating themselves to religious life is presented here with a wealth of material relating to their work Many widely held misconceptions about nuns are dispelled by the author's analysis of the growth and distribution of the religious orders and congregations the scope and scale of their work and the ensuing financial and recruitment demands Nuns and sisters took hands on responsibility for the building running and staffing of large and complex institutions hospitals and schools Their services were not solely confined to the needs of the expanding Roman Catholic community but had an impact on the surrounding society at many levels This book makes a novel contribution to our understanding of the provision of welfare services by non state agencies It explores the socio economic origins of recruits and the importance of the contribution made by the nuns many of them Irish women migrants to educational and social development in England and Wales Fully illustrated it also provides maps and valuable tabulated data to open up this field of research for social history scholars and others interested in the achievements of these women

*Culture and Class in English Public Museums, 1850-1914* Kate Hill,2005 This work is in part a study of the creation of professional authority and autonomy by museum curators More importantly though it is about the stabilization of middle class identities by the end of the nineteenth century around new hierarchies of cultural capital By examining urban identities through the cultural lens of the municipal museum we are able to reconsider and better understand the subtleties of nineteenth century urban society

**Reader's Guide to British History** D. M. Loades,2003 A masterful attempt to describe the historical secondary literature of the British Isles from prehistory to the present day the set is comprised of substantial essays of 1 000 to 3 000 words each on a wide array of subjects all written by pre eminent scholars in language accessible to beginning students and advanced researchers Each listed essay title is given a thorough annotation
