Camelot A Role Playing Simulation For Political Decision Making:

Camelot James Woodworth, W. Robert Gump, James R. Forrester, 2006 CAMELOT A ROLE PLAYING SIMULATION introduces you to the interactions of contending and contentious groups and individuals whose values and goals range from radical to reactionary. It addresses such issues as equal opportunity, right to life, freedom of expression, affirmative action, property rights, gay rights, and more. You will quickly learn that competing interests and viewpoints with their varying degrees of organization and cohesiveness make political decision making complex, time consuming, exciting, and often difficult to predict.

Simulations of Decision-Making as Active Learning Tools Peter Bursens, Vincent Donche, David Gijbels, Pieter Spooren, 2018-03-05 This volume brings together both political and educational scientists. While educational research literature has so far not systematically addressed the tool of simulations of decision making, political scientists have hardly used insights from research on assessment or on motivation and interest of students. Almost all political science publications on simulations merely discuss how to implement the tool in class and fall short of providing evidence of the effects on student outcomes such as increased interest and performance. Combining the two disciplines is mutually enriching. Political science benefits from state of the art educational science measuring and testing of the claims made by the proponents of simulations while educational sciences adds the systematic analysis of simulations of decision making to their list of empirical objects which also adds insights to the theories on the affective component of student learning. It is the explicit aim of the volume to address how simulating decision making environments fosters learning. Implications for research and practice regarding student learning are addressed in all chapters.

Teaching Political Science to Undergraduates Laure Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences, in the performances for the live arts, and in the studios for visual arts, as well as ideas that are already present but not widespread in the discipline: problem solving and case studies as in the professional schools and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever. Prof Laure Paquette PhD has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own Canada and has published extensively in four languages. This is her sixteenth book.

Teaching and Learning the European Union Stefania Baroncelli, Roberto Farneti, Ioan

Horga, Sophie Vanhoonacker, 2013-10-04 This volume examines the EU's changing educational context and its challenges. Based on an extensive survey of more than 2000 European Studies courses in 30 European countries, it maps and analyses the features of teaching methodologies as they emerge from both disciplinary as well as interdisciplinary curricula. It presents a series of case studies on some of the most used innovative teaching tools emerging in the field, such as simulation, games, e-learning, problem-based learning, blended learning, and learning through the use of social networks. Based on the contributors' own experiences and academic research, the book examines both strengths and possible pitfalls of these increasingly popular methods. The book's critical approach will inspire educators and scholars committed to improving the teaching methods and tools in the area of European Studies and other programmes of higher education facing similar challenges. *Rethinking Environmental Justice in Sustainable Cities* Heather E. Campbell, Yushim Kim, Adam M.

Eckerd, 2015-05-15 As the study of environmental policy and justice becomes increasingly significant in today's global climate, standard statistical approaches to gathering data have become less helpful at generating new insights and possibilities. None of the conventional frameworks easily allow for the empirical modeling of the interactions of all the actors involved or for the emergence of outcomes unintended by the actors. The existing frameworks account for the what but not for the why. Heather E. Campbell, Yushim Kim, and Adam Eckerd bring an innovative perspective to environmental justice research. Their approach adjusts the narrower questions often asked in the study of environmental justice, expanding to broader investigations of how and why environmental inequities occur. Using agent-based modeling (ABM), they study the interactions and interdependencies among different agents, such as firms, residents, and government institutions. Through simulation, the authors test underlying assumptions in environmental justice and discover ways to modify existing theories to better explain why environmental injustice occurs. Furthermore, they use ABM to generate empirically testable hypotheses, which they employ to check if their simulated findings are supported in the real world using real data. The pioneering research on environmental justice in this text will have effects on the field of environmental policy as a whole. For social science and policy researchers, this book explores how to employ new and experimental methods of inquiry on challenging social problems, and for the field of environmental justice, the authors demonstrate how ABM helps illuminate the complex social and policy interactions that lead to both environmental justice and injustice. *Instructor's Guide with Lecture Notes to Accompany American Government, Institutions and Policies, Fifth Edition*, James Q.
