Curriculum Development An Integrative Introduction:

Curriculum Evelyn J. Sowell, 2005 For undergraduate and graduate courses in Curriculum Development and or Curriculum Planning Defining curriculum broadly as what is taught in schools this practical text arranges content around two major themes 1 curriculum processes involve decision making by people who are guided by their beliefs and values about what students should learn and 2 curricular change occurs only after individuals have made internal transitions Unlike its competition this text painstakingly bridges curriculum theory to practice exploring ways to develop curriculum implement a curriculum plan and assess a school s curriculum by applying chapter content to sample curriculum projects Through accessible jargon free language and student friendly pedagogy the author shows both how practice informs theory and how use of theory helps educators engage in curriculum tasks appropriately IJER Vol 21-N4 International Journal of Educational Reform, 2012-09-07 The mission of the International Journal of Educational Reform IJER is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities As the only peer reviewed scholarly publication that combines authors voices without regard for the political affiliations perspectives or research methodologies IJER provides readers with a balanced view of all sides of the political and educational mainstream To this end IJER includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration curriculum instruction law and research IJER should thus be of interest to professional educators with decision making roles and policymakers at all levels turn since it provides a broad based conversation between and among policymakers practitioners and academicians about reform goals objectives and methods for success throughout the world Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes Finally it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U S and the world Sustainable Futures for Higher Education Jaan Valsiner, Anastasiia Lutsenko, Alexandra Antoniouk, 2018-09-26 This volume addresses the current situation in higher education and what creative action needs to be taken for the future development of the various systems of higher education Higher education in the 21st centuries is under immense pressure from various sides First there is dramatic limitation of funding from public sources and limited and selective funding support from private sources that is re constructing the landscape of higher education in most societies around the World Secondly there is the continuous stream of administrative re organization efforts of political origins e g the Bologna process that guide the advancement of higher education in our present time Increasing privatization of all forms of higher education from bachelor to doctoral levels and its corresponding focus on the advancement of the kind of knowledge that has immediate applicability in various spheres of societies leads to the question what kind of creativity is expected from

the new cohorts of students future makers of knowledge once the current social re organization of higher education systems becomes fully established To address these questions the international interdisciplinary cast of authors in this volume provides a multitude of possible scenarios for future development of the systems of higher education This book on Sustainable Futures of Higher Education captures the current trends and perspectives of the Knowledge Makers from various nations of the world on meeting and greeting the challenges of globalization and the pressures of the knowledge economy It makes a strong case for universities of tomorrow sustaining their autonomous thinking and yet nurturing an environment of collaborative partnership with society corporate and industry to fuel innovations in plenty and continuous supply of new science and technologies Higher Education has been and shall remain a powerful vehicle of national and global transformation I see a great value of the publication in impacting the minds of the leaders in higher education around the globe for revitalizing the universities Professor P B Sharma President of Association of Indian Universities AIU How should the higher education system be in the globalization era In this book Jaan Valsiner and his colleagues analyze criticize the existing and propose a new higher education system When we say higher education three different layers are supposed to be there the lower the middle and the higher The latter has the function of production of new knowledges Without new knowledge our societies are never improving Authors warn commercialized systems such as the Bologna system overestimate the homogeneity of education Universities without Borders would guarantee both diversity and innovation in the higher education systems Professor Tatsuya Sato Dean of Research Ritsumeikan University

Humanizing Higher Education through Innovative Approaches for Teaching and Learning Enakshi Sengupta, Patrick Blessinger, Mandla Makhanya, 2021-01-18 Innovative pedagogy is the only solution that can bridge both scarcity and quality in education This edited collection showcases how innovative approaches to teaching and learning have become the need of the hour in higher education How might new technologies and a fresh take on curriculum design create a sufficient impact on learners

Teachable Moments and the Science of Education Greg Seals, 2018-08-06 This book develops a general theory of autonomous teaching by examining a mysterious educational idea the teachable moment By formulating an understanding of the teachable moment as predicated upon educational energy this book takes up John Dewey s view of teaching to articulate a law like scientifically oriented pedagogical theory By offering a testable hypothesis about effective teaching through an innovative reading of Dewey s law this book also provides insights into changes in school practice and schooling policy consonant with an understanding of teaching as a science
