focusing on real world scenarios and giving you all the information you need to build a strong Dynamics NAV implementation

Ireland's Sea Fisheries, 1400-1600 Patrick W. Hayes, 2023 This book examines the environmental political and economic history of Ireland's marine fisheries from 1400 to 1600 It combines a wide range of historical sources with innovative digital research methods to provide a comprehensive and systematic overview Government letters and court documents highlight the diverse range of fishing fleets from across Europe that visited Irish waters in the early sixteenth century bringing wealth and cultural influence to the native Irish who developed complex systems to protect and tax the visitors Furthermore trade records illustrate that fish was Ireland's premier export in the late fifteenth and early sixteenth centuries However a range of factors led to the industry's collapse by the end of the sixteenth century the Tudor conquest which disrupted fishing operations and fundamentally altered who controlled fishing resources the destabilization of Irish waters resulting from the terrestrial conflict which allowed pirates to thrive an influx of cheap cod from the newly exploited fisheries in Newfoundland which changed consumption patterns in Ireland and across Europe and shifting climatic conditions and decades of over exploitation which meant fewer fish and poorer catches Overall the book reveals that fisheries form a vital part of the broader environmental political and economic history of Ireland

Mastering Data Visualization with Tableau Dr. Arpana Chaturvedi, Prof. Praveen Malik, 2024-07-11 DESCRIPTION Mastering Data Visualization with Tableau is an invaluable book that will help you become more knowledgeable and elevate your understanding and skills in data visualization using Tableau which is one of the leading tools in the industry This comprehensive resource covers the basics of visual analytics explaining both the theory and practical ways to turn raw data into useful insights You will start with Tableau Desktop by learning to download it navigate the interface and connect to data sources The book teaches you to create and format basic charts adding interactivity with parameters sets sorting and filtering You will explore calculations and advanced visualizations like bar in bar charts and maps It covers designing interactive dashboards using text and images for storytelling and sharing work via PDFs and Tableau Public The book ends with AI features in Tableau and hands on exercises to practice Through this book readers can gain the confidence to handle complex datasets apply advanced visualization techniques and harness Tableau's full potential to make informed decisions faster and with greater accuracy This guide is your pathway to becoming proficient in the art and science of data visualization with Tableau KEY FEATURES Detailed exploration of Tableau Tableau interface dimensions measures and other visualization tools Techniques for interactive data visualization using actions filters sets parameters groups and hierarchy Advanced graphing techniques and dynamic visualization strategies calculated fields table calculations and LOD Comprehensive integration of AI to improve data analysis WHAT YOU WILL LEARN Tableau for complex data visualizations and apply predictive analytics Clean and prepare data efficiently and create interactive dashboards that drive strategic business decisions Advanced charts like bar in bar profit calendar and map visualizations Gain practical hands on experience with a question bank based on various industry use cases enhancing your ability to tackle

real world data challenges WHO THIS BOOK IS FOR This book is an excellent resource for students from any discipline data scientists business analysts and professionals eager to master Tableau for comprehensive insights effective dashboards and advanced data analysis

TABLE OF CONTENTS

- 1 Introduction to Data Visualization and Visual Analytics
- 2 Getting Started with Tableau Desktop
- 3 Connecting to Data Sources and Data Interpretation

- 12 Data Cleaning and Preparation Using Tableau Prep Builder

Cases in Managerial Data Analysis William Lee Carlson,1997 Intended as a supplement in introductory courses in business and economic statistics this casebook offers real data based problems from every functional area in business and economics

Advanced Excel for Scientific Data Analysis Robert De Levie,2008 Combining an easy going style with an emphasis on practical applications this greatly expanded second edition is remarkable in scope and coverage As reviews of the first edition noted the term advanced in the title is not used lightly Less than a third of its 700 pages are devoted to least squares analysis yet the reader will learn about many aspects of this ubiquitous method that are seldom found together in one volume multivariate and polynomial centering the statistical uncertainty in uncertainty estimates how to use the covariance singular value decomposition the pros and cons of weighted least squares moving equidistant least squares nonlinear least squares and imprecision contours There are lucid chapters on Fourier transformation convolution and deconvolution and digital simulation of ordinary differential equations A new chapter is devoted to some common but often only crudely used mathematical methods such as numerical differentiation Romberg integration and cubic spline interpolation Another new chapter shows how to use linear algebra on the spreadsheet with Volpi s extensive matrix toolbox of custom functions and macros A third newly added chapter describes how to set up the spreadsheet to make it less error prone and how to get superaccurate answers in Excel The substantially enlarged chapter on writing functions and macros now has a set of MacroMorsels to illustrate specific points that otherwise might trip up novice programmers and a detailed description of Excel s extensive debugging tools All this is presented in an easily digestible format illustrated with many examples from the literature and supported by a large collection of open access i e fully transparent and user modifiable custom functions and macros
