**Life: The Science of Biology: Volume II** William K. Purves, Gordon H. Orians, David Sadava, H. Craig Heller, 2003-12-08

This is an authoritative introductory text that presents biological concepts through the research that revealed them. Life covers the full range of topics with an integrated experimental focus that flows naturally from the narrative. Life: The Science of Biology David E. Sadava, 2011. This text aims to establish biology as a discipline not just a collection of facts. Life develops students' understanding of biological processes with scholarship, a smooth narrative, experimental contexts, art, and effective pedagogy. **The Impact of Print-On-Demand on Academic Books** Suzanne Wilson-Higgins, 2017-11-21. The convergence of online book selling, digital printing, digital document workflow management, and the computerization of small parcel logistics created a unique opportunity to create a viable commercial model for printing and supplying books on demand. This innovation was swiftly embraced by the academic publishing community, heralding the rescue of the languishing academic monograph. The possibilities captured the imagination of creative academic and niche publishers, enabling custom publishing, student editions of monographs, self-compiled wiki books, and even the establishment of new university presses and open access publishers. The Impact of Print on Demand on Academic Books takes an in-depth look at this phenomenon by looking back on two decades of innovation, reviewing the present state of academic publishing with respect to works being printed on demand, and compiling the current forecasts and speculation about the future of academic and niche publishing, given the impact of print on demand. Presents knowledge on the print on demand industry and chronicles developments and their impact on publishing. Provides a useful guide for practitioners and students of publishing and is ideal for academic publishing historians and business academics interested in innovation and digital developments. Includes an international perspective with information from Europe, North America, Australia, and Singapore. China. Chronicles business case studies collected from interviews with key individuals from companies who have shaped or are shaping the academic POD landscape.

Life William K. Purves, 2004. New edition of a text presenting underlying concepts and showing their relevance to medical, agricultural, and environmental issues. Seven chapters discuss the cell, information, and heredity, evolutionary process, the evolution of diversity, the biology of flowering plants and of animals, and ecology and biogeography. Topics are linked by themes such as evolution, the experimental foundations of knowledge, the flow of energy in the living world, the application and influence of molecular techniques, and human health considerations. Includes a CD-ROM which covers some of the subject matter and introduces and illustrates 1,700 plus key terms and concepts. Annotation copyrighted by Book News Inc.
