Management Eighth Edition Paperback, Custom Publication Griffin, Terry, Miriam Griffin, 2004-06 *Institutions, Economic Performance and Sustainable Development* Biman C. Prasad, Clement Allan Tisdell, 2006 Fiji has distinct institutional features that make it an ideal case for examining and discussing the consequences of institutional arrangements particularly the nature of property rights for national economic performance development prospects and the state of the environment which in turn reflects a nation's ability to achieve sustainable development Furthermore the nature of institutional arrangements in Fiji can be used to illustrate aspects of both the new and the old institutional economics Apart from the fact that Fiji provides considerable scope for the exploration of institutional economics and its applications Fiji is a comparatively important island nation in the south west Pacific that is an important member of the Pacific Island Forum grouping of 14 island nations The recent development of Fiji has been much influenced by its social history particularly by its institutional structures established or codified during British colonial rule Its present racial composition is largely a product of British colonisation of Indians brought to Fiji by the British to produce sugar cane as a contribution to the economic development of the former British Empire In many respects the type of global imperialism that was well established during the nineteenth century was a forerunner to modern economic globalisation which involves a mixture of free trading blocs and multilateralism The current population mixture of Fiji consisting of about equal numbers of Indian Fijians and Indigenous Fijians has its roots in Fiji's colonial history Furthermore the codified systems of property rights which largely excludes Indian Fijians from the ownership of land was established by the British It has been a major source of ethnic tension and of social and political conflict in Fiji We show that this system of property rights has had important negative consequences for economic growth in Fiji for the economic performance of its industries and for the conservation of its natural resources natural resources which may not be equitable and which also does not appear to be efficient administratively This adds to social and political tension in Fiji *Managing Inflation and Supply Chain Disruptions in the Global Economy* Akkucuk, Ulas, 2022-08-15 As the COVID 19 pandemic comes to a close inflation has revealed itself to be a major problem for all countries of the developed world The problem has been exacerbated in developing nations which had problems even before the pandemic Energy prices have increased and with the increase in transportation costs it has been more difficult for many retailers to stock shelves as they did before the pandemic It is understood by many that the rising prices and supply chain disruptions will likely not be temporary and must be managed by future executives Managing Inflation and Supply Chain Disruptions in the Global Economy uncovers the many ways businesses can manage this new phenomenon It discusses global crises and their effects on the global economy in terms of inflation and supply chain Covering topics such as inflationist impact crisis leadership and deglobalization this premier reference source is an essential resource for economists supply chain specialists government officials consultants business leaders and executives logistics professionals IT managers
