Can Africa Survive Arguments Against Growth Without Development:

Can Africa Survive? Basil Davidson, 1975 **Contemporary Issues in Africa's Development** Ehimika A.

Ifidon, Richard A. Olaniyan, 2018-04-18 This volume reports on the state of crisis in Africa in the early twenty first century Africa on the eve of the independence revolution was the continent of hope and high expectations By the third decade of independence optimism had been replaced by dismay African states had been beset by ethno political squabbles military rule civil wars Islamic and insurgent movements extreme poverty and disease With the ascent of redemocratization in the 1990s and of new pan Africanism derived from the formation of the African Union Africa appeared set to claim its vaunted destiny This book asks with hindsight to the first decade of the twenty first century how real was the renaissance in African life If the dismal African condition is a phase in the historical development of Africa this volume does not see any golden age in the past to which Africa aspires to return There is clearly a continuation and persistence of crisis with an absence of good governance personalisation of state power widespread disease and policy failure in education economy and infrastructural development Although endowed with abundant human and natural resources Africa remains the least developed and most indebted continent Whither then the African Renaissance The methodologies that underpin the contributions in this book are as diverse as the specialisations of the contributors The collection questions ideologically protected assumptions and presumptions presenting Africa as it is because it is only by knowing where Africa truly stands that a proper direction can be charted for it *Dilemmas of Weak States* Tatah Mentan, 2017-11-30 Given the dramatic changes that have taken place in global politics in recent years especially following September 11 2001 it is time to examine a series of critical issues confronting the global political economy One of the most important of these issues is terrorism and its relationship with weak states This book examines the weak state terrorism nexus with particular emphasis on Africa Specifically it provides an in depth analysis of state weakness poverty and the opportunities offered by the latter for the breeding of terrorism and terrorists It also looks at the part played by radical Islam in transnational terrorism in Africa Emerging from this study is recognition of a need for the international system to analyze a wide range of issues that contribute to the weakening of African states *Self-Serving Public Leadership and Governance* Obinna Ubani-Ebere, 2022-12-19 Leadership matters in everything Shared humanity is at risk of paralysis if the society lacks trustable transparent and accountable leadership for the well being of the society A nation is nothing but a perishable commodity if it lacks leadership foresight or vision and continually stands on a blind spot of political social and economic development Government is an asset if it has utility or values that impact citizens positively and improve their well being or livelihood In contrast the government is a total liability or lacks utility or values if its actions impede unity progress and development or undermine citizens well being Greed is the common denominator of public corruption Moreover corruption is a consequence of self serving leadership and governance in African countries demolishing hopes aspirations and ingenuity Thus public corruption in African countries is the great

conspiracy against innocent and poor citizens by the politicians elites and religious aristocrats causing obstacles to development Consequently there is a high possibility of political economic and social failures or marginalization of the poor when a nation s political governance is besieged by sit tight leadership syndrome self serving leaders greedy mindsets and corrupt leaders Here are the two critical questions Can African countries escape paralysis meltdowns or extreme poverty if the government is controlled by self serving public leaders who focus on themselves while ignoring the challenges of the larger society Can African countries survive the mediocrity of governance and frequent devastations due to the menace of religion tribalism and corruption in government public leadership and governance
