

Introduction to Computers & Windows Operating system

Introduction to Computers: Computers are one of the biggest technical developments of the 19th century. Computer are not only used by scientists or engineers, it is popular today with all kinds of people from businessmen to employee or school going children. Unlike the development of other areas of scientific and technical , the computer science has grown up at very rapid. Today the computers are household name.

The human brain is the most sophisticated asset of humanity and has been blessed by god. The computers are the most versatile machine the human has ever discovered. It is the most intelligent representative to man's intelligence and wisdom. Computers are not to replace the human intelligence and memory but to assist him to reduce burden on his memory. Computers have come to assist humanity in his task like collecting, memorizing and analyzing the large amount of information.

Computers are machines that perform tasks or calculations according to a set of instructions, or **programs**. The first fully electronic computers, introduced in the 1940s, were huge machines that required teams of people to operate. Compared to those early machines, today's computers are amazing. Not only are they thousands of times faster, they can fit on your desk, on your lap, or even in your pocket.

Computers work through an interaction of hardware and software. **Hardware** refers to the parts of a computer that you can see and touch, including the case and everything inside it. The most important piece of hardware is a tiny rectangular chip inside your computer called the **central processing unit (CPU)**, or **microprocessor**. It's the "brain" of the computer—the part that translates instructions and performs calculations. Hardware items such as your monitor, keyboard, mouse, printer, and other components are often called **hardware devices**, or **devices**.

Software refers to the instructions, or programs, that tell the hardware what to do. A word-processing program that you can use to write letters on your computer is a type of software. The operating system (OS) is software that manages your computer and the devices connected to it. Windows is a well-known operating system.

What is a Computer?

"It is an electronic calculating machine, capable of accepting input signals (Data), performing mathematical and logical operation(Process) as per stored program and supplies output signal(Result)"
