areas to embrace the new way of working are the legal ones. However, it is not just the legal firms and public sector which are looking to employment technology in order to cut costs. Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits. For example, restaurants are using recruitment technology in order to lower salaries and costs. Until a few years ago, when every restaurant had a fixed cost of hiring, training and maintenance, the vast majority of restaurants were able to pay 100% of their employees' salaries. This meant that it was possible to pay a manager less than a waiter and save money. However, with the inclusion of recruitment technology, the cost of hiring employees is being cut by up to 50%. This does not necessarily mean that the amount of profit is increased, but employees are able to be assigned to different tasks, meaning that they spend less time in front of customers, thus increasing their profits.
