*ChatGPT and Global Higher Education: Using Artificial Intelligence in Teaching and Learning*, ChatGPT and Global Higher Education Using Artificial Intelligence in Teaching and Learning      **Artificial Intelligence (AI) in Social Research** Prokopis A. Christou, 2025-04-08 The field of social research is characterized by its broad scope and interdisciplinary nature encompassing the examination of human behaviour societies and various facets of social existence however it is influenced by numerous factors including technological advancements It is therefore no surprise that Artificial Intelligence AI has rapidly become a driving force bringing about substantial transformations within the field The use of AI assisted tools and programmes for the collection analysis and interpretation of both quantitative and qualitative data is increasing at a remarkable pace The implications of utilizing these applications are significant and noteworthy While these technologies present numerous opportunities it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement With a focus on AI s research implications this book explores various considerations and examples across different disciplines of social research      *Mastering Sovereign Artificial Intelligence* Mark Nasila, 2025-10-06 Data like oil or minerals is a vital resource and who owns it is critical especially as it fuels the artificial intelligence AI revolution Sovereign AI is about much more than countries merely owning their data it s about control It ensures AI aligns with their cultural ethical and legal frameworks It s about making sure AI works for people and not the other way around Businesses nations and leaders are quickly realising the need to embrace sovereign AI This marks a profound shift from building software to creating intelligence AI has already transformed the world how we think about its ownership will determine what comes next In this groundbreaking and thought provoking book Mastering Sovereign Artificial Intelligence AI expert researcher and speaker Dr Mark Nasila explores what sovereign AI really means how it differs from other AI models and why understanding it is essential for the future He outlines the shifting geopolitical landscape of AI and the emerging trends shaping international competition delving into how AI intersects with national security the economy and global power Data and AI sovereignty demand that countries develop skilled AI workforces establish AI factories and embed governance and ethics from the very start of any AI strategy With insights from leading global experts this handbook is essential reading for anyone who s interested in AI from individuals and business leaders to policymakers and parents concerned about the future of work AI is the defining asset of our age and how we choose to own and govern it will shape the destiny of nations and our place in the world Contributing authors are Somil Gupta Prof Benjamin Rosman Isazi Consulting Dr Tapiwa Chiwee Aaron Frank Atenkosi Ngubevana Amb Dr Lavina Ramkissoon and Mic Mann      *Technology for Good* Jim Fruchterman, 2025-09-02 A visionary guide to using technology for positive social change from a MacArthur genius awardee former rocket engineer and passionate leader in the social enterprise movement The accepted wisdom in big business is that the only worthy ideas are ones that make a lot of money preferably billions But

Jim Fruchterman believes there is a different path for technology. What if tech returned to its roots and made people more effective and powerful? What if the benefits of technology came to the 90 percent of humanity traditionally neglected by for-profit companies in favor of immense profits gained by focusing on the richest 10 percent? In *Technology for Good*, Fruchterman explores that question and delivers a comprehensive how-to for leaders who want to create, expand, join, support, and improve organizations that see building technology as a key element of delivering on their social good mission. The author makes a strong case that tech is required for social change at scale. He then offers guidance on how to structure, fund, staff, manage, scale, and sustain nonprofits that leverage technology for social good. The book includes actionable, proven practices, compelling case studies of nonprofits that have cracked the code on tech for good, and Fruchterman's own stories of what he has learned as a tech-for-good entrepreneur. With 80 percent of the examples in the book from organizations and individuals outside the US, *Technology for Good* is a call to action with a genuinely global focus, blazing a path toward a future in which human beings come rightly and justly before profits.

Preston D. Feden, Robert Mark Vogel, 2003 *METHODS OF TEACHING: APPLYING COGNITIVE SCIENCE TO PROMOTE STUDENT LEARNING* helps prospective teachers learn how to apply recent findings by cognitive scientists to their classroom practices in order to promote true conceptual change among their students. The book focuses squarely on ways to bring about deep rather than surface learning to all students. The authors use and model many of the teaching strategies they present, focusing on major core concepts and utilizing a rich array of pedagogical features to help prospective teachers build a deep understanding of how people learn and what strategies they can use as teachers to help their students achieve long-lasting comprehension. Throughout the text, the authors emphasize the need to change instruction in light of new findings from cognitive science. Planning for instruction, behavior management, and technology are integrated into each chapter.
