Generative Artificial Intelligence and Creativity Matthew J. Worwood, James C. Kaufman, 2025-11-21 GENERATIVE ARTIFICIAL INTELLIGENCE AND CREATIVITY PRECAUTIONS PERSPECTIVES AND POSSIBILITIES explores the dynamic relationship between generative Artificial Intelligence genAI and creativity This book brings together global scholars from diverse fields to explore the transformative impact of genAI on human creativity As technological advancements in genAI continue to accelerate this book navigates through the complexities of understanding and harnessing its potential Generative Artificial Intelligence and Creativity not only dissects the fundamental principles underlying genAI's contribution to creativity but also addresses the paradoxical impact of genAI on human creative industries This book serves as a unique guide for anyone seeking to comprehend the implications of genAI on the future of human creativity Outlines how AI could broaden the scope of human creativity by introducing new tools and methodologies Examines how AI can enhance the seven transdisciplinary creativity skills Discusses the impact of robots in stimulating creativity in children and adults highlighting the potential risks and benefits Reviews generative AI's impact on education and possible impacts equity [How to Think about Data Science](#) Diego Miranda-Saavedra, 2022-12-23 This book is a timely and critical introduction for those interested in what data science is and isn't and how it should be applied The language is conversational and the content is accessible for readers without a quantitative or computational background but at the same time it is also a practical overview of the field for the more technical readers The overarching goal is to demystify the field and teach the reader how to develop an analytical mindset instead of following recipes The book takes the scientist's approach of focusing on asking the right question at every step as this is the single most important factor contributing to the success of a data science project Upon finishing this book the reader should be asking more questions than I have answered This book is therefore a practising scientist's approach to explaining data science through questions and examples [Successful Process Mining Projects](#) Roland Woldt, 2025-09-15 Driving blind and too fast or not fast enough Most organizations have a hard time seeing where their performance lacks They see the metrics from the past but don't have visibility into how these numbers were produced What went well and what did not go so well and why So they have no idea how to improve their processes Do organizations measure the performance of their processes Well often I see only some lagging metrics being measured There are almost no predictive measures being defined and processes are not adapted to changing situations for example when it comes to delays of a supplier shipment There are just a few organizations that actually have their processes formally designed in the form of process models And those who do might see them only as an exercise to appease the gods their management or the regulators This creates interesting results when it comes to audits some poor souls figuring out what actually happens which might lead to regulatory notes that you have not made enough progress or even to hefty fines Overall I am missing an awareness of the need to measure what you are doing Some smart person once said You can only measure what you see and

how boring would a football match be if we had not defined what winning means and how you can create the necessary points on the scoreboard

Process Intelligence a new frontier for Process Management Over the last couple of years I have seen more interest in addressing these issues Process mining is the speedometer for your business It gives you visibility into how your processes are executed Not only the happy path that you might or might not have documented but all variations that you get from your runtime systems Process mining gives you calculated performance metrics out of the box like frequencies and times and shows you where you have rework or other unwanted behaviors Dashboards show metrics that allow you to investigate your performance hypotheses Data from mining can be embedded in existing BI dashboards You can trigger actions from thresholds and interact with running process instances think notifications alerts or transactions Process mining is embedded in a larger BPM practice You can download discovered processes to use for future state design or simulation Or you upload reference processes and the tool checks to what degree you have conformed to how the work should be done Mining technologies close the missing gap in the process lifecycle and provide a data driven analysis approach for performance management

Who is this book for This book is for people who are serious about how they can improve how their organizations run and how they can make their next large transformation project a success It is for the process and architecture practitioners who run their programs for years and don't get the visibility that they deserve It is for the analysts who want to switch their practices to a data driven approach while not forgetting the human contributions in the analysis and for whom the words Digital Gemba sound good And it is for the curious folks who have heard about process intelligence and were wondering what this means and how this fits into their organizations without creating another hype and disappointment when the results of the first project do not meet expectations As you know the first time you do something you most likely suck and that is the same here But wait this is not all This book also comes with an accompanying website which includes additional tools all graphics as PDF and a checklist for your mining projects It also comes with the necessary source files data workflows reference models in BPMN format an ARIS database and an ARIS Process Mining project

The Editors Stephen Harrison, 2024-08-13 With the pace of a thriller and the heart of a drama Taylor Lorenz The Editors is unnervingly familiar to anyone who has googled scrolled or browsed online in the past decade Aim for Neutrality We Need Better Sources Anonymity is Fundamental Keep Developing The editors know these principles The editors follow them every day usually The editors may not be recognized on the street but they craft the information that is seen on nearly every internet search Through Infopendium a global crowd sourced internet encyclopedia the editors influence the world Freelance journalist Morgan Wentworth recently laid off from PopFeed News attends the Global Infopendium Conference in New York expecting a straightforward story to help pay the rent But the so called pendium people are full of surprises PhDs rub shoulders with high school students all quoting the project's rules and regulations like a second language Sure millions of people see the facts curated by these editors but who really cares about the free encyclopedia When a hacker attacks the

conference and posts a cryptic message it becomes clear that somebody does And Morgan decides to find out who But the path through an online information war is far from clear Foreign governments billionaires and a global virus threaten to sway the truth on Infopendium And far from Morgan's sight in places as different as Beijing and Kansas some of the editors have plans of their own

Missing Each Other Edward Brodtkin, Ashley Pallathra, 2021-01-26 A Next Big Idea Club Winter 2021 Must Read The ability to connect with another person's physical and emotional state is one of the most elusive interpersonal skills to develop but this book shows you just how approachable it can be In our fast paced tech obsessed lives rarely do we pay genuine close attention to one another With all that's going on in the world and the never ending demands of our daily lives most of us are too stressed and preoccupied to be able to really listen to each other Often we misunderstand or talk past each other Many of us are left wishing that the people in our lives could really listen understand and genuinely connect with us Based on cutting edge neuroscience research and years of clinical work psychiatrist Edward Brodtkin and therapist Ashley Pallathra take us on a wide ranging and surprising journey through fields as diverse as social neuroscience and autism research music performance pro basketball and tai chi They use these stories to introduce the four pillars of human connection Relaxed Awareness Listening Understanding and Mutual Responsiveness Accessible and engaging *Missing Each Other* explains the science research and biology underlying these pillars of human connection and provides exercises through which readers can improve their own skills and abilities in each

[China's New Era](#) Annie Luman Ren, Ben Hillman, 2024-06-06 According to Communist Party discourse China's New Era began when Xi Jinping was anointed Party boss in 2012 The shape of this New Era became eminently clear in 2023 when Xi commenced his third five year term as General Secretary of the Party a fortification of one man authoritarian rule unprecedented in post Mao China Under Xi the Party has expanded its influence over government the economy and society The Party State is now more Party than State The year 2023 saw other new eras for China as well Despite initial optimism sparked by the end of COVID 19 restrictions in late 2022 the Chinese economy in 2023 was buffeted by continuing property sector woes record unemployment and an unfolding local government debt crisis Globally China adopted a series of new and ambitious diplomatic initiatives to woo the Global South and amplify its voice on the world stage The China Story Yearbook 2023 China's New Era provides informed perspectives on these and other important stories that will resonate for years to come
