Earth Observation Systems For Resource Management And Environmental Control:

Earth Observation Systems for Resource Management and Environmental Control D. Clough, 2013-03-09 The NATO Science Committee and its subsidiary Programme Panels provide support for Advanced Research Institutes ARI in various fields The idea is to bring together scientists of a chosen field with the hope that they will achieve a consensus on research directions for the future and make recommendations for the benefit of a wider scientific community Attendance is therefore limited to those whose experience and expertise make the conclusions significant and acceptable to the wider community Participants are selected on the basis of substantial track records in research or in the synthesis of research results to serve mankind The proposal for a one week ARI on Earth Observation and Information Systems was initiated by the NATO Special Programme Panel on Systems Science SPPOSS In approving the ARI the senior NATO Science Committee identified the subject as one of universal importance requiring a broad perspective on the development of operational systems based on successful experimental systems The general purpose of this ARI was to address the critical problems of integrating the relatively new science and technology of remote sensing into operational earth observation and management information systems The main problems of concern were those related to systems design organization development of infrastructure and use of information in decision processes The main emphasis was on problems of transferring technologies and methods from experimental to operational systems

Earth Observation Systems for Resource Management and Environmental Control D. Clough, 2014-01-15 *Earth Resources*, 1988 *Novel AI Applications for Advancing Earth Sciences* Yadav, Sudesh, Yadav, Satya Prakash, Raj, Pethuru, Tiwari, Prabhakar, Albuquerque, Victor Hugo C. de, 2023-12-29 The Earth Sciences industry faces a new challenge the need for accurate efficient and reliable methods to monitor and predict geological phenomena and environmental changes As climate change earthquakes and other natural disasters become more frequent and severe the necessity for advanced tools and techniques is paramount Traditional methods often fall short in providing the precision and speed required to address these critical issues Geologists and earth scientists who are grappling with the urgent problem of utilizing artificial intelligence AI to revolutionize their field will find the solution within the pages of *Novel AI Applications for Advancing Earth Sciences* This book offers the research community concepts expanding upon the fusion of AI technology with earth sciences By leveraging advanced AI tools such as convolutional neural networks support vector machines artificial neural networks and the potential of remote sensing satellites this book transforms the identification of geological features geological mapping soil classification and gas detection Scientists can now predict earthquakes and assess the probability of climate change with unprecedented accuracy Additionally the book explains how the optimization of algorithms for specific tasks substantially reduces the time complexity of earth observations leading to an unprecedented leap in accuracy and efficiency
