*and the  
Environment*

The background of the cover is a collage of four circular images. The top-left circle shows a river flowing through a mountainous landscape. The top-right circle shows a lush green forest with a waterfall. The bottom-left circle shows a cross-section of the Earth's interior, with a red, swirling mantle and a grey, layered crust. The bottom-right circle shows a blue body of water, possibly a lake or a wide river, with a white sandy beach in the foreground. The overall theme is Earth science and the environment.

T. Rhodes, 2012-06-15 It s impossible to grasp the whole planet or integrate all the descriptions of it But because we live here we have to try This is not just an artistic compulsion or an existential yearning still less an academic exercise It s a survival issue This is the only planet we have We re stuck here and we don t own the place it would be the height of arrogance to assume that we do We re tenants here not owners but we re tenants with hope for a long term tenancy We want to extend our lease just as far as we can from Earth A Tenant s Manual In Earth A Tenant s Manual the distinguished geologist Frank H T Rhodes President Emeritus of Cornell University provides a sweeping accessible and deeply informed guide to the home we all share showing us how we might best preserve the Earth s livability for ourselves and future generations Rhodes begins by setting the scene for our active planet and explaining how its location and composition determine how the Earth works and why it teems with life He emphasizes the changes that are of concern to us today from earthquakes to climate change and the clashes over the energy resources needed for the Earth s exploding population He concludes with an extended exploration of humanity s prospects on a complex protean and ultimately finite world It is not a question of whether the planet is sustainable the challenge facing life on Earth and the life of the Earth is whether an expanding and high consumption species like ours is sustainable Only new resources new priorities new policies and most of all new knowledge can reverse the damage that humanity is doing to our home and ourselves A sustainable human future Rhodes concludes in this eloquent sobering but ultimately optimistic book will require a sense of responsible stewardship for we are not owners of this planet we are tenants Surveying the systems large and small that govern Earth s processes and influence its changes Rhodes addresses the negative consequences of human activities for the health of its regulatory systems but offers practical suggestions as to how we might effect repairs or at least limit further damage to our home      *Physical Geology* James S.
