**East Asian Labor Markets and the Economic Crisis** Gordon Betcherman, Rizwanul Islam, 2001 This book looks at the impacts of the Asian economic crisis on the labor market examining how various countries responded. It identifies the labour policy reforms needed in areas of unemployment benefit, active labour market programs, support for vulnerable groups and social dialogue.

**East Asian Labor Markets and the Economic Crisis** Gordon Betcherman, Rizwanul Islam, 2001

**Recent Financial Crises** The late Lawrence R. Klein, Tayyeb Shabbir, 2007-01-01 Financial crises are recurring phenomena that can cause significant economic and societal loss. This book is therefore vitally important as it analyzes why and how financial crises occur, the extent of their impact and what can be done to prevent their recurrence or reduce the damage they cause. Comprising original and never before published papers by distinguished economists, this book offers insights about lessons that were or should have been learned from recent outbreaks of such crises in East Asia and elsewhere. *Recent Financial Crises* also presents a set of econometric studies of issues such as labor market behavior, investment and productivity and exchange rate adjustments. Although China did not have a crisis, its economic behavior was closely monitored in order to see if that had any effect on the crisis conditions. In this respect, the book contains an estimation of China's core inflation rate as well as its true cost of living index over a 20 year period spanning the Asian financial crisis. In general, collectively the studies point to a need for ongoing structural reforms to minimize vulnerability to crises or soften their impact. The necessity for resorting to viable safety nets is also stressed. Policymakers and central bankers will find this book of great value, as will scholars and researchers at many levels of academe involved in financial business and international economics.

*Trade and Employment in Asia* Niny Khor, Devashish Mitra, 2013-07-31 This volume investigates the links between employment, trade and structural transformation. In the context of global rebalancing accompanied by inevitable changes in trade patterns between Asia and the rest of the world, the volume's chapters analyze the links between trade openness and trends in employment and its quality. Specifically through Asian case studies, both analytical and econometric, the volume examines how trade and export-led growth models have led to specialization and evolving demands on various types of labor. The rapidly changing labor market contours in developing Asia during this era of globalization, along with the new context resulting from the recent global financial crisis and new insights from theoretical literature, have led to the need for such studies. This volume helps fill this gap in the literature.

*Risk Inequality and Welfare States* Philipp Rehm, 2016-05-31 Focusing on the distribution of risk within societies, this book presents a parsimonious theory of social policy emergence, divergence and change. It is suitable for advanced undergraduate courses and graduate seminars in political economy, social policy, labor market politics, political behavior, political psychology, sociology and class stratification.

*Employment and Inclusive Development* Rizwanul Islam, Iyanatul Islam, 2015-02-11 Issues relating to employment and labour have once again come to

the fore of global policy debates in the wake of the widespread unemployment that has accompanied the current financial crisis In the developing world there is a growing realization that productive employment promotion and social protection have to be at the core of inclusive growth and development This book supports the view that employment is a cross cutting issue shaped by macroeconomic and microeconomic policy interventions and provides a capacious framework to analyse the complexity of this global debate It covers a wide range of issues that have received insufficient attention in the discourse of development and labour economics These include the impact of macroeconomic policies on employment labour rights the development of human capabilities and employability youth employment the benefits and costs of labour market flexibility and the importance of social protection for all This important book aims at filling this gap by revisiting old debates and reconnecting them to the contemporary context combining analyses with relevant empirical evidence It will appeal to a diverse readership of academic institutions and think tanks international organizations bilateral donors working on development issues and policy makers in developing countries
