Early Pottery Technology Function Style And Interaction In The Lower Southeast:

Early Pottery Rebecca Saunders, Christopher T. Hays, 2004-12-26 A synthesis of research on earthenware technologies of the Late Archaic Period in the southeastern U S Information on social groups and boundaries and on interaction between groups burgeons when pottery appears on the social landscape of the Southeast in the Late Archaic period ca 5000 3000 years ago This volume provides a broad comparative review of current data from first potteries of the Atlantic and Gulf coastal plains and in the lower Mississippi River Valley and it presents research that expands our understanding of how pottery functioned in its earliest manifestations in this region Included are discussions of Orange pottery in peninsular Florida Stallings pottery in Georgia Elliot s Point fiber tempered pottery in the Florida panhandle and the various pottery types found in excavations over the years at the Poverty Point site in northeastern Louisiana The data and discussions demonstrate that there was much more interaction and at an earlier date than is often credited to Late Archaic societies Indeed extensive trade in pottery throughout the region occurs as early as 1500 B C These and other findings make this book indispensable to those involved in research into the origin and development of pottery in general and its unique history in the Southeast in particular *Archaic Societies* Thomas E. Emerson, Dale L. McElrath, Andrew C. Fortier, 2012-02-01 Sweeping and detailed this long awaited volume is an indispensable guide to the Archaic period across the midcontinent Archaeologists throughout the region share the latest excavation results and analytical perspectives to reveal and reinterpret the worlds of those Native peoples who lived there for some 9 000 years up to about 3 000 years ago Of particular concern is the establishment of relative and absolute chronologies for the Archaic period the relationships between the artifacts left behind and the peoples who made and used them and the changing interactions between cultures climate and landscape Archaeologists offer useful up to date overviews of Archaic societies assessment of stratigraphic sequences and detailed discussions of finds and interpretations from the Mississippi and Ohio river regions and the Great Lakes Comprehensive and accessible this landmark book is a must for anyone wanting to understand a crucial but little understood period in North America s prehistory *Hunter-Gatherer Archaeology as Historical Process* Kenneth E. Sassaman, Donald H. Holly, 2016-10-01 The remains of hunter gatherer groups are the most commonly discovered archaeological resources in the world and their study constitutes much of the archaeological research done in North America In spite of paradigm shifting discoveries elsewhere in the world that may indicate that hunter gatherer societies were more complex than simple remnants of a prehistoric past North American archaeology by and large hasn t embraced these theories instead maintaining its general neoevolutionary track This book will change that Combining the latest empirical studies of archaeological practice with the latest conceptual tools of anthropological and historical theory this volume seeks to set a new course for hunter gatherer archaeology by organizing the chapters around three themes The first section offers diverse views of the role of human agency challenging the premise that hunter gatherer societies were bound by their interactions with the natural

world The second section considers how society and culture are constituted Chapters in the final section take the long view of the historical process examining how cultural diversity arises out of interaction and the continuity of ritual practices A closing commentary by H Martin Wobst underscores the promise of an archaeology of foragers that does not associate foraging with any particular ideology or social structure but instead invites inquiry into counterintuitive alternatives Hunter Gatherer Archaeology as Historical Process seeks to blur the divisions between prehistory and history between primitive and modern and between hunter gatherers and people in other societies Because it offers alternatives to the dominant discourse and contributes to the agenda of hunter gatherer research this book will be of interest to anyone involved in the study of foraging peoples

Archaeology in South Carolina Adam King, 2016-04-26 The rich human history of South Carolina from its earliest days to the present Adam King's Archaeology in South Carolina contains an overview of the fascinating archaeological research currently ongoing in the Palmetto state featuring essays by twenty scholars studying South Carolina's past through archaeological research The scholarly contributions are enhanced by more than one hundred black and white and thirty eight color images of some of the most important and interesting sites and artifacts found in the state South Carolina has an extraordinarily rich history encompassing the first human habitation of North America to the lives of people at the dawn of the modern era King begins the anthology with the basic hows and whys of archeology and introduces readers to the current issues influencing the field of research The contributors are all recognized experts from universities state agencies and private consulting firms reflecting the diversity of people and institutions that engage in archaeology The volume begins with investigations of some of the earliest Paleo Indian and Native American cultures that thrived in South Carolina including work at the Topper Site along the Savannah River Other essays explore the creation of early communities at the Stallings Island site the emergence of large and complex Native American polities before the coming of Europeans the impact of the coming of European settlers on Native American groups along the Savannah River and the archaeology of the Yemassee people whose history is tightly bound to the emerging European society The focus then shifts to Euro Americans with an examination of a long term project seeking to understand George Galphin's trading post established on the Savannah River in the eighteenth century A discussion of Middleburg Plantation one of the oldest plantation houses in the South Carolina lowcountry is followed by a fascinating glimpse into how the city of Charleston and the lives of its inhabitants changed during the seventeenth and eighteenth centuries Essays on underwater archaeological research cover several Civil War era vessels located in Winyah Bay near Georgetown and Station Creek near Beaufort as well as one of the most famous Civil War naval vessels the H L Hunley The volume concludes with the recollections of a life spent in the field by South Carolina's preeminent historical archaeologist Stanley South now retired from the South Carolina Institute of Archaeology and Anthropology at the University of South Carolina

Reconstructing Human-Landscape Interactions Pam Dickinson, Jason Jeandron, Lucy Wilson, 2009-03-26 Reconstructing Human Landscape Interactions demonstrates the high

quality of work presented at the first Developing International Geoarchaeology conference DIG 2005 held in Saint John New Brunswick Canada and exemplifies the over riding theme of this discipline People have always used the landscape in many ways as a place to live as a place to grow crops as a source of natural resources Those actions leave their traces The characteristics of the landscape constrain which activities are possible just as social and cultural habits condition people s connection with the environment Geoarchaeology is about finding the traces of these interactions and using them to reconstruct how people in the past behaved in their environmental context The material covered in the proceedings ranges from broad themes of climate change and landscape use to more specific subjects such as river avulsion and the use of tidal ponds The papers move us from the land to the coastal margin and back onto land to examine particular techniques The final paper leads us beyond archaeology and points out that geoarchaeological data must contribute to the debate about the sustainability of present day land use practices a fitting challenge to take us into the future **Investigating the Ordinary**

Sarah E. Price, Philip J. Carr, 2024-07-09 Focusing on the daily concerns and routine events of people in the past Investigating the Ordinary argues for a paradigm shift in the way southeastern archaeologists operate Instead of dividing archaeological work by time periods or artifact types the essays in this volume unite separate areas of research through the theme of the everyday **Shaman, Priest, Practice, Belief**

Stephen B. Carmody, Casey R. Barrier, 2019-12-31 Archaeological case studies consider material evidence of religion and ritual in the pre Columbian Eastern Woodlands Archaeologists today are interpreting Native American religion and ritual in the distant past in more sophisticated ways considering new understandings of the ways that Native Americans themselves experienced them Shaman Priest Practice Belief Materials of Ritual and Religion in Eastern North America broadly considers Native American religion and ritual in eastern North America and focuses on practices that altered and used a vast array of material items as well as how physical spaces were shaped by religious practices Unbound to a single theoretical perspective of religion contributors approach ritual and religion in diverse ways Importantly they focus on how people in the past practiced religion by altering and using a vast array of material items from smoking pipes ceremonial vessels carved figurines and iconographic images to sacred bundles hallucinogenic plants revered animals and ritual architecture Contributors also show how physical spaces were shaped by religious practice and how rock art monuments soils and special substances and even land and cityscapes were part of the active material worlds of religious agents Case studies arranged chronologically cover time periods ranging from the Paleoindian period 13 000 7900 BC to the late Mississippian and into the protohistoric contact periods The geographical scope is much of the greater southeastern and southern Midwestern culture areas of the Eastern Woodlands from the Central and Lower Mississippi River Valleys to the Ohio Hopewell region and from the greater Ohio River Valley down through the Deep South and across to the Carolinas Contributors Sarah E Baires Melissa R Baltus Casey R Barrier James F Bates Sierra M Bow James A Brown Stephen B Carmody Meagan E Dennison Aaron Deter Wolf David H Dye Bretton T Giles Cameron Gokee Kandace D

Sanger, David G. Anderson, 2010 The late Archaic of the American Southeast is typically described as a time of population growth innovative developments in subsistence strategies and increased social complexity Although it is difficult to generalize many early Woodland communities are characterized as relatively small scale fairly mobile foragers organized into unranked or minimally ranked lineages and clans Early Woodland groups also seem to be more socially isolated than their late Archaic predecessors with a decline in regional exchange networks The papers in this volume were presented at a conference entitled What Happened in the Late Archaic which was co sponsored by the American Museum of Natural History and the St Catherines Island Foundation and held on St Catherines Island Georgia May 9 11 2008 The Third Caldwell Conference invited the participants to engage the appropriate archaeological data from the American Southeast specifically addressing the nature of change during the late Archaic early Woodland transition This volume consists of a dozen substantive papers followed by three discussant contributions *Feast, Famine or Fighting?* Richard J. Chacon, Rubén G. Mendoza, 2017-01-20 The advent of social complexity has been a longstanding debate among social scientists Existing theories and approaches involving the origins of social complexity include environmental circumscription population growth technology transfers prestige based and interpersonal group competition organized conflict perennial wartime leadership wealth finance opportunistic leadership climatological change transport and trade monopolies resource circumscription surplus and redistribution ideological imperialism and the consideration of individual agency However recent approaches such as the inclusion of bioarchaeological perspectives prospection methods systematically investigated archaeological sites along with emerging technologies are necessarily transforming our understanding of socio cultural

evolutionary processes In short many pre existing ways of explaining the origins and development of social complexity are being reassessed Ultimately the contributors to this edited volume challenge the status quo regarding how and why social complexity arose by providing revolutionary new understandings of social inequality and socio political evolution Ancient Complexities Susan M.
