Easier Said Than Done Milton D. Heifetz, 1992 For nearly two decades medical ethics has matured in the fields of philosophy religion and theology and psychology But now at last in Easier Said Than Done a practicing physician describes the principles of an ethic that can justify sound medical decisions Milton D Heifetz M D noted neurosurgeon and author of the controversial book The Right To Die has made the tough decisions in tragic often anguishing situations As a member of hospital ethics committees for many years Dr Heifetz found that discussions of complex issues many involving urgent matters of life and death were all too often clouded by tradition dogma and gut reactions A comprehensive moral foundation with the flexibility to respond to often rapidly changing circumstances is desperately needed if health care professionals are to confront head on the daily questions of medical ethics Dr Heifetz offers it here in a book that he hopes will help all who must make difficult medical choices physicians and nurses as well as patients and their families His insights will also prove invaluable to policy makers who are struggling to develop substantive rules for medical conduct *Lethal Judgments* Melvin I. Urofsky, 2000 He shows how these 1997 cases relate to two other famous cases Karen Ann Quinlan and Nancy Beth Cruzan and carries the controversy up to the recent trials of Dr Jack Kevorkian Urofsky considers the many facets of this knotty argument He differentiates between discontinuation of medical treatment assisted suicide and active euthanasia and he sensitively examines the issue s social and religious contexts to enable readers to see both sides of the dispute He also shows that in its ruling the Supreme Court did not slam the door on the subject but left it ajar by allowing states to legislate on the matter as Oregon has already done By treating assisted suicide simply as a legal question observes Urofsky we miss the real importance of the issue The Publishers Weekly ,1993 **Current Catalog** National Library of Medicine (U.S.),1992 First multi year cumulation covers six years 1965 70 *Library Journal* ,1992 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association,1992 List of members in v 1 National Library of Medicine Current Catalog National Library of Medicine (U.S.),1992 Exploring Osaka David M. medicine or social justice Lowe makes a compelling argument for how the medical humanities can help to go beyond the traditional biographical and epistemic breaks to see into the nature and properties of suffering and what is at stake Lowe demonstrates through analysis of major healthcare workforce issues and incidence of burnout how key policies and practices influence healthcare education and experiences of both patients and health professionals By including first person narratives from health professionals as a tool and resource she illustrates how dominant ideas about the self enter practice as a refusal of suffering Demonstrating the relationship between personal experience theory and research Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self This is an important read for all those interested in medical humanities health professional education person centred care and the sociology of health and illness      Recent Acquisitions Ohio State University.
