## **Disparate Ladders Why School Universit:**

Disparate Ladders Arnold J. Heidenheimer, 1997-01-01 This study breaks new ground in examining how political factors helped lead three countries with highly regarded education systems to evolve quite different structures and processes in their secondary and higher education sectors Their educational ladders are disparate because the techniques and timing for selecting students for further educational opportunities vary both among the three nations and within the German and Swiss federal systems The comparative analysis seeks to place the Japanese trajectory with reference to European developments and to account for some of its unique aspects Building on an extensive record of publication on comparative education policies and welfare state development Heidenheimer places special emphasis on exploring the network of relationships between the various levels of the educational system and tiers of government Following a strategy of integrated comparative analysis the various national school and university types are directly compared as to their permeability nature of administrative supervision curricula and examination practices Contrasting the ways in which political parties and bureaucracies have made and adapted policies helps clarify how and why specific innovations became political issues at the national and regional levels Through close contextual case analysis the study probes why despite great differences in political institutions some secondary school policies became especially embattled in all three countries Heidenheimer explains why the German Lander have maintained a monopoly in the university sector whereas in both centralized Japan and decentralized Switzerland national governments operate and finance key parts of the university sector Also analyzed is the impact of post unification developments on East German university expansion Whereas many Swiss schools have no principal German courts have ruled that principals have tenure in their jobs This comparative treatment by a political scientist complements studies of education by sociologists and economists analyzing how differences in political institutions have helped shape some distinctive policy emphases Based on original research and a broad command of the literature Disparate Ladders will appeal to school administrators educators political scientists social historians sociologists and multiculturalists

**The Cross-cultural Transfer of Educational Concepts and Practices** Masahiro Tanaka, 2005-05-16 This book analyses comparatively the creation of American and Japanese universities on the model of German universities largely in the late nineteenth century and the reform of German and Japanese universities on the model of American universities after the end of the Second World War The argument is that transferring educational concepts and practices from one cultural context to another involves not merely a transfer but a transformation How and why this transformation occurs is what this book is about More precisely it is suggested that transformation of educational concepts and practices during their cross cultural movement can be understood within a theoretical perspective that is proposed and developed in the book This book is divided into six chapters Chapter One as the introduction analyses several scholars approaches to the aspects of educational transfer then attempts to construct a theoretical perspective for the book on the processes of change in educational concepts and practices during their movement across cultures Chapters Two and Three offer two narratives to investigate how German university concepts and practices were transmuted as a consequence of local actors efforts to import these concepts and practices into Japan and the United States Chapters Four and Five provide another two narratives to examine how American university concepts and practices were altered as a result of American actors attempts to export these concepts and practices to Japan and Germany Chapter Six as the conclusion through reflecting on the four narratives given in the main chapters re examines the ways in which the theoretical perspective of this book is useful to understand the processes of transformation of educational concepts and practices during their movement from one culture to another
