Black American Students in An Affluent Suburb John U. Ogbu, 2003-02-26 John Ogbu has studied minority education from a comparative perspective for over 30 years The study reported in this book jointly sponsored by the community and the school district in Shaker Heights Ohio focuses on the academic performance of Black American students Not only do these students perform less well than White students at every social class level but also less well than immigrant minority students including Black immigrant students Furthermore both middle class Black students in suburban school districts as well as poor Black students in inner city schools are not doing well Ogbu's analysis draws on data from observations formal and informal interviews and statistical and other data He offers strong empirical evidence to support the cross class existence of the problem The book is organized in four parts Part I provides a description of the twin problems the study addresses the gap between Black and White students in school performance and the low academic engagement of Black students a review of conventional explanations an alternative perspective and the framework for the study Part II is an analysis of societal and school factors contributing to the problem including race relations Pygmalion or internalized White beliefs and expectations levelling or tracking the roles of teachers counselors and discipline Community factors the focus of this study are discussed in Part III These include the educational impact of opportunity structure collective identity cultural and language or dialect frame of reference in schooling peer pressures and the role of the family This research focus does not mean exonerating the system and blaming minorities nor does it mean neglecting school and society factors Rather Ogbu argues the role of community forces should be incorporated into the discussion of the academic achievement gap by researchers theoreticians policymakers educators and minorities themselves who genuinely want to improve the academic

achievement of African American children and other minorities In Part IV Ogbu presents a summary of the study's findings on community forces and offers recommendations some of which are for the school system and some for the Black community Black American Students in an Affluent Suburb A Study of Academic Disengagement is an important book for a wide range of researchers professionals and students particularly in the areas of Black education minority education comparative and international education sociology of education educational anthropology educational policy teacher education and applied anthropology

Cracks in the Pavement Martin Sanchez-Jankowski, 2008-09-02 Neighborhoods have been central to American sociology since its inception yet we have understood little about how the institutions in urban communities evolve disappear or persist over time Instead as of late many scholars have treated neighborhoods as collections of individuals and families ignoring the institutional ecology Understanding the dynamic role of local institutions is critical not only to sociological scholarship but also to important public policy debates about urban poverty Martin Sanchez-Jankowski offers the reader an important comprehensive look at how local institutions ranging from barbershops to street gangs to public housing both reflect and shape the culture and daily rhythms of the residents who live with them His ecological perspective offers an important missing link in debates about neighborhood effects and should be read by anyone interested in understanding urban poverty Dalton Conley author of *Being Black Living in the Red Race Wealth and Social Policy in America* In his famous and moving preface to *Les Misérables* Victor Hugo warns us that as long as there is poverty such tales will be told But stories are not often told about the resurgence of poor communities their struggles to mobilize and change their condition But this book does just that filling in the rest of the picture and not of individual Horatio Algiers but with textured and critical analysis of the barriers these communities face and the pathways they take to achieve social change Troy Duster New York University

New Frontiers in Ethnography Sam Hillyard, 2010-11-04 Addresses continuities and innovations within the ethnographic canon This title uses Hammersley's 1991 book *What's Wrong with Ethnography* to open and situate the debate and engages with contemporary debates and arguments on both sides of the Atlantic

Irvine,1990-03-26 Research findings by the National Commission on Excellence the Children s Defense Fund and the College Board among others suggest that much work remains to be done to upgrade the educational experience and performance of the fastest growing segment of the American school population blacks and other minorities This country s survival and strength will ultimately depend on the quality of education given to this important group that has been systematically and effectively excluded from the benefits of educational opportunity Without these benefits blacks and other minorities will never achieve economic independence and the self perpetuating cycle of poor school achievement poverty and teen parenthood will grind on relentlessly This important study addresses the many facets of this complex problem by explicating its many roots assessing strengths and weaknesses inherent in the present system and proposing strategies for dynamic changes Chapter 1 reviews
