Biever,Maryann Karinch,2012-08-09 Have you ever had a daydream If so you ve had a dissociative experience The same is true if you ve had an out of body moment or thought you were somewhere else as you drifted off to sleep These are seemingly harmless and temporary dissociations But further down the spectrum of such experiences you find people actually traveling to a strange city and suddenly not remembering how they got there You also find people with multiple personalities and other disordered thinking In The Wandering Mind Dr John Biever and co author Maryann Karinch use the stories of people all along the spectrum of dissociative conditions from those who are perfectly normal to those diagnosed with Dissociative Identity Disorder to expose the natures and functions of dissociation Their lives and stories serve as a way of exploring chronic dissociation and the trek back to good mental health The authors look closely at what signs and symptoms indicate normal everyday dissociation and those that indicate a more serious problem While daydreamers may not meet the criteria

for diagnosis trauma victims who relive their nightmares in real time may require both diagnosis and treatment The authors also delve into the phenomenon of deliberate dissociation such as Buddhist monks in meditation And they take a close look at the process of diagnosing a dissociative disorder as well as factors that put patients on the road to reintegration and recovery

Children See Dead People Rob Armstrong, One of the most famous lines in movie history is I see dead people uttered by a young boy Is there any reason to believe that children can see the dead Do they have spooky powers denied to adults Do they grow out of these powers as they reach puberty Do they forget that they once interacted with the dead One study says that by age seven 65 percent of children have had an imaginary friend Are these imaginary friends actually spirits Do children have the dead as their imaginary playmates They re not imaginary at all They re real but they re dead Children are natural mediums psychics and necromancers They can channel the other world Is the poltergeist phenomenon caused by children s imaginary friends Can imaginary friends operate externally to children s minds Are some children in cahoots with spirits There is nothing more fascinating than the psychic abilities of children and the astonishing thing that eventually happens to them which suppresses their paranormal powers in order to allow them to enter the normal world the adult world What would you prefer to remain a child all your life and have paranormal powers or to become an adult and sacrifice your paranormal powers Nature has made this a tradeoff Do you want to be Peter Pan who can fly but can never grow up or do you want to join the adults and have adult fun and also adult responsibilities Why do children lose their natural powers Is it possible to get these powers back Can adults recover their lost paranormal abilities the abilities which society warned them as children never to play with It s always dangerous to play with fire It s even more dangerous to ignore your natural fire Isn t it time to light up your life
