Distance We Travel:

The Distance We Travel William Daniel Ehrhart,1993 **Radarmen 3 & 2** United States. Bureau of Naval Personnel,1960 **The Last Time I Dreamed About the War** Jean-Jacques Malo,2014-04-04 This is a collection of essays on the life and writing of W D Ehrhart poet essayist memoirist and teacher The twenty contributors scholars publishers poets are from the U S France Britain the Netherlands Austria India and Japan Some are Vietnam or Iraq war veterans The collection overall studies various aspects of Ehrhart s writing as well as his direct influence on the lives of people both as a writer and as a teacher The volume concludes with a selection of Ehrhart poems chosen by the contributors because they embody some quality discussed in the essays The book includes a selected bibliography of Bill Ehrhart s published writings

Hearings United States. 60th Congress. 1st session, 1907-1908. House. [from old catalog],1908 **Sensitivity Analysis** Emanuele Borgonovo,2017-04-19 This book is an expository introduction to the methodology of sensitivity analysis of model output It is primarily intended for investigators students and researchers that are familiar with mathematical models but are less familiar with the techniques for performing their sensitivity analysis A variety of sensitivity methods have been developed over the years This monograph helps the analyst in her his first exploration of this world The main goal is to foster the recognition of the crucial role of sensitivity analysis methods as the techniques that allow us to gain insights from quantitative models Also exercising rigor in performing sensitivity analysis becomes increasingly relevant both to decision makers and modelers The book helps the analyst in structuring her his sensitivity analysis quest properly so as to obtain the correct answer to the corresponding managerial question The first part of the book covers Deterministic Methods including Tornado Diagrams One Way Sensitivity Analysis Differentiation Based Methods and Local Sensitivity Analysis with Constraints The second part looks at Probabilistic Methods including Regression Based methods Variance Based Methods and Distribution Based methods The final section looks at Applications including capital budgeting sensitivity analysis in climate change modelling and in the risk assessment of a lunar space mission *A Collection Of Curious Coincidences* Kenneth Diehl,2022-12-14 We live in a divided world Politics nationality customs economic status and more seem to be the stuff of contention and conflict None more so than the zealots that divide our search for and understanding of the truth regarding our existence On the one hand we have the naturalists who believe that the entire universe can be explained by science On the other hand there are the religious who believe that everything has already been explained through faith Many in both camps believe that only their view is correct and the other must be wrong In support of their belief each side has their rationalizations that serve only to satisfy their own egos and comfort members who already support their opinions What if both camps are equally right What if science and faith are reconcilable Wouldn t that be interesting This book is an attempt to illuminate beliefs from both camps that appear quite coincidentally to be saying the same thing It is an effort to illustrate how details of what we learn through physics chemistry history archaeology and other sciences appear to support the broad

explanations of what we believe on faith It is offered as an explanation of how if we really stop to think about what we believe we know we may find some common ground between the two extremes of faith and science that can stand the scrutiny of criticism Furthermore it is not an attempt to evangelize or convert It is a collection of topics where both science and faith have a lot to say and to this author s mind appear to be in tremendous agreement Hopefully the discussions herein will prompt greater interest in evaluating our beliefs and encourage the reader to look deeper into their apparent meaning In any case I hope the reader finds the topics as interesting as they are challenging
