The Governance of Transitions - The Transitions of Governance Martijn van der Steen, Johan Burger, Werner Burger, 2018-12-18 Why is societal transition not simply a matter of change management or normal policy design South Africa is living proof of the ability of a society to reinvent and reinstall itself With the advent of new societal challenges came the need for real societal innovation especially in sectors where it was never deemed necessary or possible before This book asks What type of governance is helpful for developing new societal institutions and systems that can overcome systemic crises in emerging economies and fragile communities What emerges is a compilation of chapters that introduce different parts of a solution which can be used in developing both a growing body of practices of governed societal transitions and the associated transition of governance The Governance of Transitions The Transitions of Governance in part aims to provide building blocks which government and society could use to develop strategies for creating sustainable outcomes It considers what kind of leadership organisation or methods for accountability enable new types of governance and what the most important barriers are Systems Thinking for Management Consultants Rajneesh Chowdhury, 2019-06-20 This book discusses how systems thinking and approaches can aid management consultants in navigating the complexities of client advisory in current realities It thereby brings to the forefront aspects of holism flexibility and responsibility the keys to success in today's world Management consultants are called in to offer an independent expert view of an organisation a situation and are expected to address some of the most pressing problems businesses face The client does not exist in a silo but in a complex environment that lies at the intersection of a range of internal and external factors that are often unseen and unpredictable The organisation itself presents an alien territory that the consultant is expected to acclimatise to within a very short period of time and come up with solutions that insiders would not have been able to visualise The book presents a

range of ideas concepts and reference cases that are relevant and topical for consultants in their daily work It argues that systems thinking allows holism and flexibility in management consulting while holism is about the ability to encompass the environmental and organisational complexity flexibility is about the ability to think creatively and adopt different approaches to accommodate this complexity With commentaries case studies conceptual models and perspectives that cut across multiple industries sectors and countries this book is a valuable resource for academics and professionals alike The book's inner pages and its page on Springer.com contain additional comments providing perspectives of clients industry experts and academia

Unity from Diversity Ray W. Cooksey, 2024-07-15 This book is about the choices that researchers can make when building knowledge in social and behavioural spaces Knowledge is the unity we seek and given that social and behavioural research is a human endeavour focusing on human lives and experiences there are diverse and ever evolving pathways towards achieving that unity Any one pathway will only ever yield partial glimpses into human life and diversity of potential choices serves to enrich expand and enlarge those glimpses in pursuit of more complete understanding The book shows that researchers and the researched are far more connected than disconnected in this world and those connections are spread out through a network of interlinked complex systems The book argues that pluralist systemic thinking provides the means by which a researcher's methodological choices for navigating the Data Triangle comprising data source data gathering and data analysis strategies and the learning they provide can be fully and robustly contextualised with respect to those systems and the expectations and influences that emerge from them Such contextualisations facilitate the refinement augmentation and or narrowing of those choices during the researcher's journey Anticipating choices downstream may have implications for more immediate choices and more immediate choices may create a cascade of necessary downstream choices An essential part of contextualisation involves making choices about patterns of guiding assumptions modes of knowledge building and research frames Researchers must develop the capacity to be flexible and adapt to unanticipated emergent events obstacles and political influences making trade offs where necessary throughout

their research journey always with an eye on both feasibility and quality. Importantly, research has no meaning unless the researcher can ensure that it connects with intended audiences via specific research outcomes, especially since the ultimate judgments about the convincingness, meaningfulness, quality, and utility of the research are vested in those audiences. Throughout the book, special attention is devoted to the roles that stakeholders and gatekeepers play in shaping the researcher's journey, as well as to what can be learned from Indigenous First Nations perspectives on social and behavioural research.

Learning for Change in ADB, 2009. The rapidly changing and at times excessively complex nature of development work demands diverse competences from aid agencies such as the Asian Development Bank. The learning challenges these present require the ability to work more reflectively in a turbulent practice environment. This publication broadly defines a learning organization as a collective undertaking rooted in action that builds and improves its own practice by consciously and continually devising and developing the means to draw learning from its own and others' experience. It identifies the 10 challenges that ADB must overcome to develop as a learning organization and specifies practicable next steps to conquer each. It can help deliver the increased development effectiveness that Strategy 2020, ADB's long-term strategic framework for 2008-2020, seeks.

Learning in Development Olivier Serrat, 2010. Learning in Development tells the story of independent evaluation in ADB from its early years to the expansion of activities under a broader mandate, points up the application of knowledge management to sense-making and brings to light the contribution that knowledge audits can make to organizational learning. It identifies the 10 challenges that ADB must overcome to develop as a learning organization and specifies practicable next steps to conquer each. The messages of Learning in Development will echo outside ADB and appeal to the development community and people having interest in knowledge and learning.
