Divided Cities New York And London In The Contemporary World:

Divided Cities Susan S. Fainstein, Ian Gordon, Michael Harloe, 1992 *Divided Cities* is the comparative analysis of New York and London which many have been waiting for. Wider in scope and richer in detail than any previous study, this work provides the best introduction available to these pre-eminent world cities. Seeming at times to mirror each other across the Atlantic, New York and London stand at the apex of their respective national hierarchies as economic and cultural capitals and occupy similarly commanding positions within the world economy. From decline in the 1970s to renewal in the 1980s, both cities once again face decline in the 1990s, exhibiting ever-widening social divisions. While struck by the many socio-political similarities of New York and London in their responses to global economic restructuring, the authors also delineate the quite distinctive political structures and social divisions constituted by class, race, and gender of each city. At the heart of the book lies the question: In what sense, if any, was there an urban revival in the last decade and for whom? In answering this question, *Divided Cities* traces the influence of international economic forces and national and local policies upon the fortunes of New York and London.

Transnational Lives in Global Cities Caroline Plüss, 2018-12-21 This book investigates the transnational experiences of Chinese Singaporeans who lived in one of four global cities: Hong Kong, London, New York, or Singapore. Plüss argues that these middle-class, well-educated and often highly skilled migrants mostly experienced a sense of disembeddedness and not cosmopolitanism or hybridity in their transnational lives. The author's multi-sited study intersects the Chinese Singaporeans' highly varied perceptions of these global cities and their biographies to show that these migrants, who often were repeat migrants, foremost experienced ruptures and disjuncture in their education, work, family, and/or friendships/lifestyle contexts. Transnational disembeddedness is explained in terms of the Chinese Singaporeans' access to resources and their views of self, others, places, and societies. Plüss recommends that research on these migrants should more fully account for the complexities of transnational processes and contribute with such a knowledge to the scholarship on transnationalism, migration, race, and ethnicity, and migrant non-integration.

International Handbook of Globalization and World Cities Ben Derudder, 2012-02-01 This Handbook offers an unrivalled overview of current research into how globalization is affecting the external relations and internal structures of major cities in the world. By treating cities at a global scale, it focuses on the stretching of urban functions beyond specific place locations without losing sight of the multiple divisions in contemporary world cities. The book firmly bases city networks in their historical context, critically discusses contemporary concepts, and key empirical measures and analyses major issues relating to world city infrastructures, economies, governance, and divisions. The variety of urban outcomes in contemporary globalization is explored through detailed case studies. Edited by leading scholars of the Globalization and World Cities GaWC Research Network and written by over 60 experts in the field, the Handbook is a unique resource for students, researchers, and academics in urban and globalization studies, as well as for city professionals in planning and policy.

Britain's Cities Michael Pacione, 2002-11-01

Uneven distribution of life is a dominant feature of the city Major social economic and spatial divisions are apparent in terms of income and wealth health crime housing and employment This text offers an introduction to current processes of urban restructuring geographies of division and contemporary conditions within the city The geography of Britain s cities is the outcome of interaction between a host of public and private economic social and political forces operating at a variety of spatial scales from the global to the local A deeper understanding of the nature of urban division and of the problems of and prospects for local people and places in urban Britain must be grounded in an appreciation of the structural forces processes and contextual factors which condition local urban geographies This book combines structural and local level perspectives to illuminate the complex geography of socio spatial division within urban Britain It combines conceptual and empirical analyses from researchers in the field

Megacities Frauke Kraas, Surinder Aggarwal, Martin Coy, Günter Mertins, 2013-07-12 As urbanization continues and even accelerates scientists estimate that by 2015 the world will have up to 60 megacities urban areas with more than five million inhabitants With the irresistible economic attractions of urban centers particularly in developing countries making the influx of citizens unstoppable many of humankind s coming social economic and political dramas will be played out in megacities This book shows how geographers and Earth scientists are contributing to a better understanding of megacities The contributors analyze the impact of socio economic and political activities on environmental change and vice versa and identify solutions to the worst problems They propose ways of improving the management of megacities and achieving a greater degree of sustainability in their development The goals of wise use of human and natural resources risk reduction both social and environmental and quality of life enhancement are agreed upon But as this text proves the means of achieving these ends are varied Hence chapters cover an array of topics from health management in Indian megacities to planning in New York to transport solutions for the chronically traffic choked Bangkok Authors cover the impact of climate change on megacities as well as less tangible issues such as socio political fragmentation in the urban areas of Rio de Janeiro This exploration of some of the most crucial issues that we face as a species sets out research that is of the utmost importance with the potential to contribute substantially to global justice and peace and thereby prosperity
