## **Divided Existence And Complex Society An Historical Approach:**

**Divided Existence and Complex Society** Jan Hendrik Berg, 1974      **Acrobatic Modernism from the Avant-garde to Prehistory** Jed Rasula, 2020 Moving through a vast geographical cultural and artistic terrain and juxtaposing numerous modernist works this volume explores the multiplicity of modernism and provides in depth case studies including of James Joyce's *Finnegans Wake* the reception of jazz music in Europe and the Cubist movement in the visual arts      *Preaching to Second Generation Korean Americans* Matthew D. Kim, 2007 This in depth study on preaching to second generation Korean Americans the first of its kind is based on empirical and ethnographic fieldwork Matthew D Kim conducted surveys and semi structured qualitative interviews with Korean American pastors and second generation young adult respondents in three geographic regions of the United States the Midwest the West Coast and the East Coast His primary conceptual framework employs social psychologists Hazel Markus and Paula Nurius theory of possible selves to facilitate the process of congregational exegesis in the second generation Korean American church context This book offers a new contextual homiletic model that enables Korean American preachers to engage in deeper levels of ethnic and cultural analysis in their sermon preparation Simultaneously the author reconstructs conventional preaching roles of Korean American preachers and second generation listeners so that they may co creatively imagine new possible selves that radically advance Christian mission and practice in the world This book will serve as a primary or secondary source for upper level undergraduate graduate and postgraduate courses on preaching communication studies ethnic and racial studies cross cultural ministry or social psychology      *Individualizing Psychological Assessment* Constance T. Fischer, 1994 First Published in 1994 Routledge is an imprint of Taylor Francis an informa company      *The Making of Meaning* Niklas Luhmann, Michael King, 2022 For the first time this publication makes available to Anglophone readers a sociology of knowledge and culture as developed by the sociologist and social theorist Niklas Luhmann Luhmann is typically described as writing only about systems and as such about a topic that sociologists relegate to the annals of history However this publication reveals that sociology has acted prematurely overlooking the rich and detailed sociology of knowledge and culture that on the one hand uses terms like meaning memory and communication and on the other is very capable of using such terms in the form of a historical analysis that unravels the making and transformation of key concepts and questions that shape the understanding of modern society like individuality and individualism culture and memory and social class This theoretical approach and the empirical material as well as the insights drawn from their combination yield rich and surprising results and show a very different image of Luhmann than that of system theorist As such this volume will be of great interest to scholars in the field of social theory sociology of knowledge and cultural sociology but also conceptual and cultural history as well as culturally oriented research in the arts and humanities      **Disrupted Patterns** , 2022-03-07 This collection of essays explores the significance of modern chaos theory as a new paradigm in literary studies and argues for the usefulness of borrowings from one discipline to another

Its thesis is that external reality is real and is not merely a social construct On the other hand this volume reflects the belief that literature as a social and cultural construct is not unrelated to that external reality The authors represented here furthermore believe that learning to communicate across disciplinary divides is worth the risk of looking silly to purists and dogmatists In applying a contemporary scientific grid to a by gone era the authors play out Steven Weinberg s exhortation to mind the clues to the past that cannot be obtained in any other way It is of course necessary to get the science right yet the essays in this collection do not seek to do science but rather to suggest that science and literature often share common assumptions and realities Thus there is no attempt to legitimize literary study through the adoption of a scientific approach Interaction between the disciplines requires mutual respect and a willingness to investigate the broader implications of scientific research Consequently this volume will be of interest to students and scholars of the long eighteenth century whether the focus is on England Locke Milton Radcliffe Lewis France Cr billion Diderot Marivaux Montesquieu or Germany Kant Moritz Goethe Fr Schlegel Moreover given its multiple thrust in employing mythological philosophical and scientific notions of chaos this volume will appeal to historians and philosophers of the European Enlightenment as well as to literary historians The volume ultimately aspires to promote communication across centuries and across disciplines
