Divorce Process A Handbook For Clinicians:

The Divorce Process Craig A. Everett, 1986 **The Divorce Process** Craig Everett, 2021-03-24 Professionals who work with divorcing couples and their families will be inspired by this important book on effective clinical assessment and intervention. The book blends a variety of expert contributions descriptive theoretical and empirical into a practical handbook that focuses on resources for dealing with the anger and pain of parting spouses and disrupted childhoods. A rich array of clinically useful materials is provided. The book covers background theory marital interaction the definition of clinical dysfunctions in children of divorce specific clinical features of childhood developmental levels post divorce reorganization and models of group work.

When Marriages Fail Craig Everett, Robert E Lee, 2014-01-14 Leading experts reveal systemic and integrative approaches to family therapy. *When Marriages Fail: Systemic Family Therapy Interventions and Issues* presents several leading experts in the field discussing the full spectrum of clinical interventions and family therapy for troubled and divorcing families. This comprehensive resource presents a broad overview of the literature that provides a foundation for the entire field then narrows its focus to clearly review clinical assessment models and the special issues that may be factors in conflicted families. Therapists psychologists counselors and social workers learn cutting edge recommendations for policies protecting the well being of children involved in divorce plus practical specific systemic treatment interventions that are illustrated with case studies. *When Marriages Fail* is separated into three logically organized sections. Part one provides a helpful overview of the field's evolving literature as it stands now and gives tools to therapists and their clients to explore their internal and dyadic processes in considering whether or not to divorce. The second part presents two systemic models that explore the dynamics of conflicted couples moving toward divorce and considers specific family circumstances that affect the entire divorce process such as family violence disclosure of gender orientation and the unhappiness of the family's children. Part three discusses in detail specific and practical treatment interventions considering factors involved when diverse families separate divorce and remarry. The text also provides a fitting tribute to William C Nichols a pioneer of marital and family therapy. Topics in *When Marriages Fail* include the therapist's choices in helping couples process their own choices an ecosystemic look at the rights of children in divorce interventions for mourning adulterous triangles incongruent goals cultural differences or family of origin disclosing gay or lesbian orientation in marriage domestic violence issues children's trauma in the parental break up family therapy interventions through three systemic stages of divorce remarriage of the first spouse in post divorce families trauma of the betrayed spouse parent loss and serial relationships gay divorces and more. With Forewords by Douglas Sprenkle and Augustus Y Napier as well as several international contributors who shed light on how this compelling subject is addressed outside of the United States. *When Marriages Fail* is an invaluable source of the latest knowledge and interventions for family therapists counselors social workers and psychologists.
