Jupiter and Saturn

Mark Washburn

Distant Encounters The Exploration Of Jupiter And Saturn

Jessica J Manson

Distant Encounters The Exploration Of Jupiter And Saturn:

Distant Encounters Mark Washburn, 1983 An account of the Voyager space flights discusses the successful results of the missions in terms of the acquisition of new data concerning the planets of Jupiter and Saturn *Distant Encounters* James N. Frey, 1984 **Into the Black** Peter J. Westwick, 2006-11-13 In the decades since the mid 1970s the Jet Propulsion Laboratory in Pasadena California has led the quest to explore the farthest reaches of the solar system JPL spacecraft Voyager Magellan Galileo the Mars rovers and others have brought the planets into close view JPL satellites and instruments also shed new light on the structure and dynamics of earth itself while their orbiting observatories opened new vistas on the cosmos This comprehensive book recounts the extraordinary story of the lab s accomplishments failures and evolution from 1976 to the present day This history of JPL encompasses far more than the story of the events and individuals that have shaped the institution It also engages wider questions about relations between civilian and military space programs the place of science and technology in American politics and the impact of the work at JPL on the way we imagine the place of humankind in the universe Saturn James L. Martin, 2003 First observed by Galileo Saturn lies in the distant reaches of the solar system it is the sixth planet a gaseous giant between Jupiter and Uranus It takes its name from the mythological father of Jupiter and Roman god of agriculture Because of the famous circle of rings Saturn is one of the most well regarded occupants of the galaxy Despite their continuous appearance from Earth the rings are actually space dust and debris trapped by Saturn s gravitational pull a fact garnered from several satellite passes and telescope observations The origin of Saturn s rings however remains a mystery Apart from the rings we also are aware of its moon system with the most intriguing planetoid called Titan itself having been the subject of science fiction speculation as a home to life Saturn has been visited by Pioneer 11 and the two Voyager probes with Cassini slated to arrive in 2004 Our study of this most intriguing planet will continue into the foreseeable future with the hopes of resolving the mysteries it hides This book provides a thorough and interesting overview of Saturn from its initial observation centuries ago to the contemporary satellite flybys Anyone captivated by the mysteries of space and the wonders of Saturn needs to understand the background covered here After the overview is a substantial and carefully selected set of abstracts of literature pertaining to Saturn with easy access then given through author title and subject indexes **AAAS Science Book List, 1978-1986** Kathryn Wolff, Susan M. O'Connell, Valerie J. Montenegro, 1986 A selected and annotated list of science and mathematics books which supplements the AAAS science book list 3rd ed 1970 and the AAAS science book list supplement 1978 Magill's Survey of Science: 946-1430 The development of the Mercury Project Frank Northen Magill, 1989 **Voyages Through the Universe** Andrew Fraknoi, David Morrison, 1997 Voyages Through the Universe Second Edition provides students and professors with the best of both worlds It is written by two distinguished research scientists Morrison and Wolff and an award winning astronomy educator Fraknoi This author team combines the latest science with classroom tested teaching strategies Voyages Through

the Universe is adopted at a wide range of schools elite private four year universities state schools of all levels and a variety of two year schools It is extremely authoritative and up to date as well as approachable and accessible to all students Besides the full text volume one Voyages to the Planets and volume two Voyages to the Stars and Galaxies are now stand alone complete texts This enables instructors to choose the book that best fits their needs for any length course on either or both subjects

Magill's Survey of Science: 461-046 The French space program Frank Northen Magill,1989 *National Air and Space Museum Research Report, 1984* National Air and Space Museum,1984 The Planets Byron Preiss,1989-11-01 Consists of essays by astronomers speculations by science fiction authors and illustrations by space artists

Library Journal ,1984 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **Moons and Rings** ,1991 Discusses the moons and rings associated with various planets in the solar system including Earth s moon Saturn s rings and others Realm of the Universe George Ogden Abell,1988 *The Search for Life in the Universe* Donald Goldsmith,Tobias C. Owen,1992 The authors present the most important facts about astronomy from a uniquely engaging viewpoint how can we find other advanced civilizations To address the question Goldsmith and Owen provide a fascinating description of the history and structure of the universe and then consider current ideas about the origin and cosmic distribution of life Their book is an up to the minute account of our understanding of the universe of the likelihood of life throughout the cosmos and of the ways in which advanced civilizations can make contact World renowned authority on extraterrestrial life Donald Goldsmith gives the reader a solid introduction to the subject and the revision includes new information from all areas of current astronomical research No science background is required and the mathematics level is high school algebra The Space-Age Solar System Joseph F. Baugher,1988 A thorough and up to date description of the sun planets moons asteroids and comets in our solar system Coverage is non mathematical and is presented as a travelogue of the solar neighborhood Discussion is based heavily on results obtained from recent space probes to Mercury Venus Mars Jupiter Saturn and Uranus Offers detailed descriptions of the moons of Jupiter and Saturn and the results of the recent probes of Halley s comet An extensive discussion of meteorites leads to a description of the current models of the solar system Introductory chapters present theories of the solar system from the ancient Greeks to the present day Other topics covered include the sun its structure and how it generates energy the surfaces internal structures and histories of the planets from innermost Mercury to farthest Pluto and their moons **Dynamic Astronomy** Robert T. Dixon,1989 **Astronomy** ,1984 **USA in Space** Russell R. Tobias,David G. Fisher,2006 This books includes 280 essays covering U S major space programs piloted and robotic missions satellites space centers space planes and issues from the earliest missions to the present Great Events from History II.: 1952-1969 Frank Northen Magill,1991 Mercury ,1987
