Distinctive Approach To Psychological Research The Influence Of Stanley Schachter:

A Distinctive Approach To Psychological Research Neil E. Grunberg, R. E. Nisbett, Judith Rodin, Jerome E. Singer, 2014-02-25 First published in 1987 Stanley Schachter's direct contributions are well known and are widely cited in original investigations, scholarly reviews and textbooks and courses in general psychology, social psychology and health psychology. Schachter's distinctive approach to psychological research has broken new ground in the study of deviance, affiliation, emotions, obesity, cigarette smoking and the psychology of money. It has delighted and interested uncountable numbers of undergraduates, has impressed or infuriated uncountable numbers of colleagues and has indelibly influenced the style and thinking of his graduate students. This volume presents the influence of Schachter on his students even when their work may on the surface appear to bear little resemblance to Schachter's interests.

Illusions of Reality James H. Korn, 1997-01-01 Examines the origins and the development of the use of deception in psychological research to create illusions of reality.

Biographical Dictionary of Psychology Antony J. Chapman, Wendy Conroy, Noel Sheehy, 2016-01-08 The Biographical Dictionary of Psychology provides biographical information and critical analysis of the influences and reception of over 500 people who have made a significant contribution to the field of psychology. Written by an international team of contributors, this volume charts the development of the practice of psychology worldwide from its emergence in the 1850s up to the present day. Biographies range from important historical figures to those who have had a more recent impact on the field, including Chris Argyris, Donald Broadbent, Kay Deaux, Leon Festinger, Sigmund Freud, Erich Fromm, Francis Galton, Eleanor Gibson, Doreen Kimura, Ulric Neisser, Jean Piaget, Herbert A. Simon, B. F. Skinner, Amos Tversky. Entries are alphabetically organized and similarly structured for ease of access and allowing comparison of information. Introductory biographical details cover main fields of interest, nationality, principal appointments, honours and places and dates of birth and death. This is followed by full bibliographic details of principal publications as well as secondary and critical literature which provide a useful route into further research. Following on from there is an invaluable critical appraisal of the major achievements, influences and reception of the psychologists themselves. Thorough indexing allows the reader to access information by American Psychological Association subject division, key concepts, name and institution.

War in Heaven/Heaven on Earth Stephen D. O'Leary, Geln S. McGhee, 2014-12-18 The apocalypse is a motif that lies behind many religious beliefs and practices. *War in Heaven/Heaven on Earth* theorizes the apocalyptic as it has arisen in a variety of religious traditions from Native American religion to Islam in Northern Nigeria and new terrorist movements. Millennial theory and history are explored from the perspective of social psychology, sociology and post modern philosophy. The volume is unique in applying an analysis of millennial themes to a comparative study of religion.
