Distributed Lags Problems Of Estimation And Formulation:

Distributed Lags Phoebus J. Dhrymes, 1981 This volume presents an analysis of the estimation of distributed lag models It covers the algebraic structure of lag operators and examines the estimation of problems connected with finite and infinite lag structures under a variety of assumptions pertaining to the error process This revised edition emphasizes the potential applications of distributed lags discussing the polynomial lag hypothesis and its relation to restricted least squares Also the test for autocorrelation of the error structure when the model specification contains a lagged endogenous variable is examined The material is suitable for second year graduate students in economics and for undergraduates in statistics mathematics operations research econometrics and electrical engineering providing they have a background in calculus linear algebra and mathematical statistics Distributed Lag Models Veerappen Karuppan Chetty, 1970 **Developing**

Baltagi, 2012-12-06 This book is intended for a first year graduate course in econometrics However the first six chapters have no matrix algebra and can be used in an advanced undergraduate class This can be supplemented by some of the material in later chapters that do not require matrix algebra like the first part of Chapter II on simultaneous equations and Chapter 14 on time series analysis This book teaches some of the basic econometric methods and the underlying assumptions behind them Estimation hypotheses testing and prediction are three recurrent themes in this book Some uses of econometric methods include i empirical testing of economic theory whether it is the permanent income consumption theory or purchasing power parity ii forecasting whether it is GNP or unemployment in the U S economy or future sales in the computer industry iii Estimation of price elasticities of demand or returns to scale in production More importantly econometric methods can be used to simulate the effect of policy changes like a tax increase on gasoline consumption or a ban on advertising on cigarette consumption It is left to the reader to choose among the available econometric software to use like TSP SHAZAM PcGive HUMMER LIMDEP SAS STATA GAUSS and EViews The empirical illustrations in the book utilize a variety of these software
