Distributed Leadership:

Distributed Leadership James P. Spillane, 2012-06-29 James Spillane the leading expert in Distributed Leadership shows how leadership happens in everyday practices in schools through formal routines and informal interactions He examines the distribution of leadership among administrators specialists and teachers in the school and explains the ways in which leadership practice is stretched over leaders followers and aspects of the situation including routines and tools of various sorts in the organization such as memos scheduling procedures and evaluation protocols This book is a volume in the Jossey Bass Leadership Library in Education a series designed to meet the demand for new ideas and insights about leadership in schools

Distributed Leadership Matters Alma Harris, 2013-11-22 Alma Harris is a world leading writer on the thinking and practice of distributed leadership This is undoubtedly the best book that she or anyone has yet written on the subject Andy Hargreaves Thomas More Brennan Chair in Education Boston College Alma Harris captures the essential challenges facing today's school and district leaders and summarizes in precise and accessible language important research based lessons for practice Her focus on building authentic relationships among all staff is both practical and a welcome antidote to an excessive focus on testing and standardization Karen Seashore Professor University of Minnesota The benefits of distributed leadership are yours with this research based change process Distributed leadership engaging the many rather than the few in school improvement has long been a promising theory But it must be implemented effectively before educators and students can reap the rewards including improved learner outcomes and stronger organizational performance Distributed Leadership Matters offers pragmatic approaches for realizing these benefits First Alma Harris shows why harnessing educators collective expertise is an improvement strategy worth adopting Then she details the collaborative processes that make it happen Insights include How to translate the research on distributed leadership into tangible results for your school Methods for building the social capital necessary for sustainable institutional change How to distribute leadership widely and wisely through professional collaboration The old fashioned top down leadership style no longer works for today's schools Distributed Leadership Matters is a bold step into the future

Distributed Leadership Alma Harris, 2009-03-17 Alma Harris The old of school leadership is currently preoccupied with the idea of distributed leadership Few ideas it seems have provoked as much attention debate and controversy Whatever your position on distributed leadership and you cannot fail to have one it is irrefutable that distributed leadership has become the leadership idea of the moment Yet it is an idea that can be traced back as far as the mid 20s and possibly earlier So why the interest Part of the answer can be found in a move away from theorizing and empirical enquiry focused on the single leader This shift has undoubtedly been fuelled by structural changes within schools and across school systems that have resulted in tentative models or forms of leadership practice Evidence highlights how those copying formal leadership positions are increasingly recognizing the limitations of existing structural arrangements to secure organizational growth and transformation Fullan et al 2007 Harris

et al 2008 Chapman et al 2008 As a consequence many heads and principals are actively restructuring realigning and redesigning leadership practice in their school Harris 2008 While the terminology to describe such changes varies the core principle is one of extending or sharing leadership practice While scholars have long argued for the need to move beyond those at the top of organizations in order to examine leadership Barnard 1968 Katz and Kahn 1966 until relatively recently much of the school leadership literature has tended to focus upon the head or the principal

The Distributed Leadership Toolbox Mark E. McBeth, 2008-02-19 McBeth provides useful tools to help educators diagnose the distribution of leadership in their schools and shows how these tools can help create powerful leadership for increasing learning capacity in schools Richard Halverson Assistant Professor University of Wisconsin Madison The strengths of this book are the examples two minute stories reflections etc and the reproducible tools provided Bruce Deterding Principal Wichita Heights High School KS Strengthen your leadership style and capacity to inspire others toward meaningful change Experience and research prove that effective leadership is critical for improving school performance yet reviewing and applying contemporary data to school leadership can be a complex challenge for busy administrators In *The Distributed Leadership Toolbox* Mark E McBeth translates current leadership research into a practical framework to help educational leaders improve their practice and positively influence schoolwide performance Unlike shared leadership which focuses on delegating responsibilities distributed leadership fosters a dialogue between school leaders and teachers to uncover the effectiveness of leadership practices in enhancing instruction and student achievement The author provides case studies and essential tools to help administrators Increase the ability to evaluate their leadership practice Develop a regular reflective practice to motivate staff and support professional growth Improve their potential to generate and sustain school reform efforts This guidebook includes helpful notes for facilitators and a CD ROM with resources and reproducible templates to help you make a significant difference in your school through distributed leadership practices

Distributed Leadership According to the Evidence Kenneth Leithwood, Blair Mascal, Tiiu Strauss, 2009-06-02 Although not new the concept of distributed shared leadership has re emerged in recent years as one highly promising response to the complex challenges currently faced by schools Responding productively to these challenges far exceeds the capacities of any individual leader If schools are to flourish in the future they will need to enlist the collective expertise of many more of their members and stakeholders than they have in the past The purpose of this volume is to both present and synthesize the best available evidence about the nature causes and effects of distributed school leadership The book also clarifies common misunderstandings about distributed leadership and identifies promising implications for practice and for future research Key features include Expertise Written by the most active and widely respected scholars engaged in research on distributed leadership the book encompasses the very latest knowledge about the nature causes and consequences of such leadership in schools Comparative Models The book compares various approaches to distributed leadership and examines the conditions under which some

Spillane, John B.
