Diverse Populations And Learning Styles:

Diverse Populations and Learning Styles Colleen McLaughlin, 2000

Teaching Diverse Populations Etta R.

Hollins, Joyce Elaine King, Warren C. Hayman, 1994-01-01 This book presents current knowledge about teaching culturally diverse populations traditionally underserved in the nation's public schools. It approaches the challenge of improving public school education for these students in a variety of ways including relating of cultural and experiential knowledge to classroom instruction, examining the behaviors of teachers who are effective with culturally diverse populations, analyzing effective school models, reviewing models of effective instruction, and exploring ethnic identity as a variable in the formula for school success. The discussions reveal significant insights about the implications and shortcomings of existing knowledge and its application and offer directions for future research.

The

Importance of Learning Styles Ronald R. Sims, Serbrenia J. Sims, 1995-05-23 This book provides a timely review of learning style research. It examines those approaches that purport to promote effective learning. It affirms the need for instructors and trainers to recognize the importance of individual learning differences and to use methods that help create a learning climate which increases the potential learning for all students or trainees regardless of their preferred way of learning. The ability to understand and to teach to the various learning styles of students is essential to improving the effectiveness of college-level education. In this book, Sims and Sims bring together significant research to aid academics and organizational trainers in understanding and applying learning style research and knowledge to program, course, and class development.

Multiculturalism and Learning Style Rita Dunn, Shirley A. Griggs, 1998-08-20 This text synthesizes the research on the learning style characteristics of five culturally diverse groups: Native Americans, Hispanic Americans, African Americans, Asian Americans, and European Americans. Although each of these groups has distinguishing features and differs from other groups on some of the 22 elements that constitute learning style, there are broad within-group variations that preclude generalizations. Dunn and Griggs identify a multidimensional model of learning style, describe a comprehensive assessment instrument for identifying an individual's learning style, and provide a variety of educational interventions that accommodate diverse learning style preferences.

Learning Styles in Education and Training Eugene Sadler-Smith, Carol Evans, 2006 The application of learning styles theory and research continues to hold great promise for practitioners in both education and training as a potentially powerful mechanism for enabling pupils, students, and trainees to better manage their own learning throughout their educational and working lives. The selection of papers from the 10th annual European Learning Styles Information Network conference held in July 2005 at the School of Management, University of Surrey, presented here raises a number of pertinent issues which are significant in the ongoing debate regarding the value of cognitive ability.

Practical Approaches to Using Learning Styles in Higher Education Rita Dunn, Shirley A. Griggs, 2000-04-30 Dunn and Griggs challenge the traditional instructional process of lecture-discussion in college classroom and describe the theory, practice, and

research that support a wider variety of approaches to better accommodate the learning style preferences of each student Twenty five practitioners from varied backgrounds and disciplines representing 14 colleges and universities outline alternative strategies they use with diverse students in their institutions of higher education Some of these practitioners have been using learning style for decades Others have conducted research to test the various tenets of the Dunn and Dunn Learning Style Model and a few only for the past five years have begun providing instructional strategies that are congruent with their students preferences A road map is provided for college faculty to assist them in moving toward accommodating students learning style strengths by comparing the major theories of learning styles that range from uni to multi dimensional in scope Strategies include identifying and administering valid and reliable instruments for assessing college students learning styles interpreting assessment results so that each student becomes aware of his her own strengths and is provided a computer generated prescription for improving their study skills and successfully completing assignments designing instruction to respond to both global and analytic students processing styles developing course content and materials to accommodate the learning style preferences of college students and evaluating the impact of learning styles based instruction

Middle Math Mary B. Eron,Sidney L. Rachlin,2015-10-01 Orginally published in 2005 This monograph represents the work of many mathematics teacher

educators explored the content knowledge and pedagogical knowledge that make up the middle grades learning experience. The middle grades remains a unique period of time in students' development and as such provides both challenges and promising opportunities for those who prepare teachers of middle grades mathematics. This work is the final product of an exciting NSF supported endeavor that gathered leaders in the field and explored curriculum case studies of program models at several institutions as well as issue papers on such key topics as assessment technology and preparing culturally responsive teachers. AMTE hopes this monograph will stimulate discussion and bring attention to this critical period of schooling.

Constructivist Methods for Teaching in Diverse Middle-level Classrooms Kenneth T. Henson, 2004

Constructivist Strategies for Proactive Middle Level Teachers is designed to prepare prospective middle level teachers for their first classroom experience and to help in-service teachers improve their teaching skills. Each of the themes in this book addresses a major goal set by the Carnegie Council on Academic Development or by the National Middle School Association particularly selected for middle level programs. The book employs as its focus constructivism, multiculturalism, and a proactive approach to teaching all topics of concern important to teacher educators. Prospective middle level teachers.

Career Counseling Models for Diverse Populations Nadene Peterson, Roberto Cortéz González, 2000. This breakthrough book helps readers see how career development is an important aspect of individual, group, and family therapy especially today with the fundamental changes in family relationships that have taken place as a result of the ever-growing diversity of today's working population. Unique in its coverage of diverse settings, the book is organized by age. Each model has been used with the specific age population under consideration. Each chapter is written to be put to direct use in a particular setting where career counseling can be incorporated as part of the service or education being offered. Contributors have developed or have extensively used each suggested intervention.
