Divine and Human Action Thomas V. Morris, 2019-05-15 The past three decades have seen a vigorous upsurge of interest in the philosophy of religion Nevertheless a relatively narrow range of topics has dominated the field This ground breaking volume the effort of fifteen leading American philosophers of religion represents a new movement in Anglo American philosophical theology it introduces important topics and fresh approaches to philosophical theology by centering its discussion on the relationship between God and the created universe *Divine and Human Action* Thomas V. Morris,

Theandric and Triune Ty Kieser, 2024-01-25 Describing Jesus as an agent of divine actions or as one who possesses human agency is commonplace in christological discussions Yet these discussions often wade in a shallow understanding of the terms meanings and the theological implications of such claims For example while many theologians who are committed to the definition of Chalcedon consider Jesus one agent we might ask if this implies that the triune God comprises three agents Or if Christ possesses singular agency how are his divinity and humanity operative in his actions In response this work draws from the theology of John Owen and advancements in philosophy of action in order to offer an account of divine and human agency in christological action from within the Reformed tradition It provides clarity to the christological and trinitarian uses of the language of agent agency in Christ and attends to the theological esp trinitarian entailments therein While at first glance there may appear to be internal inconsistencies with accounts that subscribe to classical trinitarianism and Reformed Christological agency this book argues that Owen helps us recover an understanding of christological agency that is internally coherent and theologically prudent As such the Reformed tradition can articulate Christological agency in a way that is coherent with the testimony of Scripture the ecumenical councils and classical trinitarianism while contributing to contemporary theological discussions The case not only provides terminological clarity and theological coherence but also inclines Christians to appreciate the trinitarian love of God in Christ's action and the human sympathy of Christ for his people

*God's Action in the World* Marek Slomka, 2021-04-22 The problem of God's action in the world is at the heart of debates today on the relationship between science and religion By analysing the issue through the lens of analytic philosophy Marek Slomka reveals how philosophy can successfully bridge science and theology to bring greater clarity to divine action This book identifies essential aspects from various branches of theism starting with traditional Thomistic approaches through to their modified forms such as Molinism and contemporary varieties such as free will theism and probabilistic theism Analysing crucial elements of God's nature including omnipotence omniscience his relation to time and the tension between immanence and transcendence Slomka reveals the difficulties in proposing a single conception of God through one theistic tradition Instead of simplistically juxtaposing particular theistic trends he highlights the value of pluralistic insights that also draw on important scientific theories including Darwin's evolution quantum mechanics and cosmology By taking a renewed stance on theism that takes into account modern scientific knowledge Slomka argues for a new presentation of the problem of God's

action in the world      *Ontology of Theistic Beliefs* Mirosław Szatkowski, 2018-08-21 This volume aims to apply ontological theories and arguments to theistic beliefs and theistic world views After an introduction that traces out the complexity of the field by categorizing the multifaceted definitions of ontology and theistic believing thirteen articles discuss specific aspects of the two terms as well as their interaction With contributions by Chris Daly Gabriele De Anna Micha G owala Christian Kanzian Daniel Linford Jason Megill Uwe Meixner Elisa Paganini Eleonore Stump Mirosław Szatkowski William F Vallicella and Peter van Inwagen      *The Metaphysics of Theism and Modality* Richard Brian Davis, 2001 In this book Richard Brian Davis explores various attempts to solve the Dependence Problem the problem posed by the following question How can necessary truths stand to God in a one way relation of dependence when neither they nor God could have failed to exist Critics charge that this problem is insoluble Davis argues at length that the most powerful and promising contemporary solutions to this problem those offered by Linda Zagzebski Brian Leftow Thomas V Morris and William Mann are all fatally flawed In making his case Davis treats the reader to helpful and interesting discussions of counterpossibles broadly logical necessity identity statements as well as the divine attributes of sovereignty aseity and simplicity He concludes with what is perhaps the most forceful and sustained defense of the claim that necessary truths can stand to God in an asymmetrical relation of causal dependence      *Free Will and God's Universal Causality* W. Matthews Grant, 2019-05-16 The traditional doctrine of God's universal causality holds that God directly causes all entities distinct from himself including all creaturely actions But can our actions be free in the strong libertarian sense if they are directly caused by God W Matthews Grant argues that free creaturely acts have dual sources God and the free creaturely agent and are ultimately up to both in a way that leaves all the standard conditions for libertarian freedom satisfied Offering a comprehensive alternative to existing approaches for combining theism and libertarian freedom he proposes new solutions for reconciling libertarian freedom with robust accounts of God's providence grace and predestination He also addresses the problem of moral evil without the commonly employed Free Will Defense Written for analytic philosophers and theologians Grant's approach can be characterized as neo scholastic as well as analytic since many of the positions defended are inspired by consonant with and develop resources drawn from the scholastic tradition especially Aquinas      *Dictionary of Christianity and Science* Zondervan, 2017-04-25 The definitive reference work on science and Christian belief How does Christian theology relate to scientific inquiry What are the competing philosophies of science and do they work with a Christian faith based on the Bible No reference work has covered this terrain sufficiently until now Featuring entries from over 140 international contributors the Dictionary of Christianity and Science is a deeply researched peer reviewed fair minded work that illuminates the intersection of science and Christian belief In one volume you get reliable summaries and critical analyses of over 450 relevant concepts theories terms movements individuals and debates You will find answers to your toughest questions about faith and science from the existence of Adam and Eve to the age of the earth evolution and string theory FEATURES

appreciation of the values of conceptual clarity and argumentative rigour it is particularly appropriate that there should be engagement between the main English language tradition and the philosophy of Aquinas and more broadly of Thomism The essays in this collection range widely across the fields of metaphysics epistemology philosophy of mind and action and theory of value with most linking analytical and Aristotelian Thomistic ideas and some focusing on Aquinas in particular This collection is distinctive in content and unusual in North American publishing in the areas of medieval philosophy scholasticism and Thomism in that the majority of the contributors are based in Europe many at medieval universities in which scholasticism had a historical presence and in some cases a prominent and distinguished one Mind Metaphysics and Value brings together the interests knowledge and expertise of a wide range of scholars to form a broad and exciting intellectual community [The New Scholasticism](#) ,1997 Includes section Book Reviews [A Fine-Tuned Universe](#) Alister E.
