Birch, A. Le, P. W. Nash, María Patricia Fernández-Kelly, 1983-01-01 The last few decades have witnessed a growing integration of the world system of production on the basis of a new relationship between less developed and highly industrialized countries The effect is a geographical dispersion of the various production stages in the manufacturing process as the large corporations of industrialized First World countries are attracted by low labor costs taxes and relaxed production restrictions available in developing countries This collection of papers focuses on inequalities among different sectors of the labor force particularly those related to gender and how these are affected by the changing international division of labor **Dominant Divisions of Labor: Models of Production That Have Transformed the World of Work** T. Janoski, D. Lepadatu, 2013-11-27 The past century of labor was definitively captured by theories like Fordism and Taylorism or scientific management but how do we make sense of global production today This short book takes a panoramic view of the candidates for the most succinct theory of the 21st century division of labor including post Fordism flexible accumulation McDonaldization Waltonism Nikeification Gatesism and Siliconism shareholder value and lean production and Toyotism Authors Thomas Janoski and Darina Lepadatu argue that lean production in a somewhat expanded version presents three variations Toyotism the strongest form Nikeification a moderate form with off shored plants lacking teamwork and Waltonism the merchandising form that presses for off shoring While all three share strong elements of just in time JIT production and supply chain management they differ in how teamwork and long term philosophies are valued This critical review of dominant established theories serves to inform subsequent research on the contemporary international division of labor **Spatial Divisions of Labor** Doreen Massey, 2024-11-01 Debate still rages over some of the questions Doreen Massey provoked in the classic first edition of Spatial Divisions of Labor such as the nature of theory the importance of contingency and uniqueness and the relationship of Marxism This second edition addresses these controversies and also reflects on other debates which have taken place over the last decade It contains a new first chapter and a lengthy additional concluding essay in which Massey takes up the issues of the book's relation to Marxism its position on explanation its argument about the conceptualization of social space and its relation to gender and feminism **Knowledge, Social Institutions and the Division of Labour** Pier Luigi Porta, Roberto Scazzieri, Andrew S. Skinner, 2001-01-01 The complex interplay of the formation and communication of knowledge the structure of social interaction and the evolution of the
