Glasmeier, Marie Howland, 1994-11-04 Through an analysis of national data and detailed case studies *From Combines to Computers* examines how the transition to a service economy is playing out for rural America It answers two important questions Will services fill the gap left by lost farming manufacturing and mining jobs And will services stabilize even revitalize rural areas Glasmeier and Howland document the intraregional spatial patterns and trends of services in the national economy compare services in urban and rural communities and identify the potential and limitations of rural development strategies based on services In particular they document the growing dominance of branch plants the displacement of mom and pop enterprises and the declining access to services for residents in the least populated rural areas The authors conclude that services are unlikely to be the basis of widespread sustainable development unless policies are designed to help firms and communities compete successfully in an increasingly global and information based economy Bulletin of the United States Bureau of Labor Statistics ,1985 **PC Mag** ,1994-02-22 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **Advanced Technology Assessment System** ,1995 **Computerworld** ,1981-05-25 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Computerworld** ,1976-06-14 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Computerworld** ,1977-06-20 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Modern Data Products, Systems, Services** ,1971 *Computerworld* ,1990-10-01 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network The Global Economy in Transition P.
