Daylight Astronomy Edward Lowbury, 1968 *Popular Astronomy*, 1920 **Popular Astronomy** William Wallace Payne, Charlotte R. Willard, Herbert Couper Wilson, Ralph Elmer Wilson, Curvin Henry Gingrich, 1896 **A History of Ancient Mathematical Astronomy** O. Neugebauer, 2004-09-17 From the reviews This monumental work will henceforth be the standard interpretation of ancient mathematical astronomy It is easy to point out its many virtues comprehensiveness and common sense are two of the most important Neugebauer has studied profoundly every relevant text in Akkadian Egyptian Greek and Latin no matter how fragmentary With the combination of mathematical rigor and a sober sense of the true nature of the evidence he has penetrated the astronomical and the historical significance of his material His work has been and will remain the most admired model for those working with mathematical and astronomical texts D Pingree in *Bibliotheca Orientalis* 1977 a work that is a landmark not only for the history of science but for the history of scholarship HAMA History of Ancient Mathematical Astronomy places the history of ancient Astronomy on a entirely new foundation We shall not soon see its equal N M Swerdlow in *Historia Mathematica* 1979 *Popular Astronomy*, 1947 **Astronomy and History Selected Essays** O. Neugebauer, 2013-11-11 The collection of papers assembled here on a variety of topics in ancient and medieval astronomy was originally suggested by Noel Swerdlow of the University of Chicago He was also instrumental in making a selection which would in general be on the same level as my book *The Exact Sciences in Antiquity* It may also provide a general background for my more technical *History of Ancient Mathematical Astronomy* and for my edition of *Astronomical Cuneiform Texts* Several of these republished articles were written because I wanted to put to rest well entrenched historical myths which could not withstand close scrutiny of the sources Examples are the supposed astronomical origin of the Egyptian calendar see 9 the discovery of precession by the Babylonians 16 and the simplification of the Ptolemaic system in Copernicus *De Revolutionibus* 40 In all of my work I have striven to present as accurately as I could what the original sources reveal which is often very different from the received view Thus in 32 discussion of the technical terminology illuminates the meaning of an ancient passage which has been frequently misused to support modern theories about ancient heliocentrism in 33 an almost isolated instance reveals how Greek world maps really looked and in 43 the Alexandrian Easter computus held in awe by many historians is shown from Ethiopic sources to be based on very simple procedures **Teacher's Guide for Daytime Astronomy** Elementary Science Study (Education Development Center), 1971
Publication of the Astronomical Society of Pomona College Pomona College (Claremont, Calif.). Astronomical Society, 1915 **The Review of Popular Astronomy**, 1910 **Astronomy Demystified** Stan Gibilisco, 2002-08-22 Allows the reader to quickly and easily grasp the math fundamentals and general concepts involved in astronomy Covers techniques for using telescopes the challenges of amateur astrophotography and the special problems of observing the sky at invisible wavelengths Unlike most books on the topic it presents general concepts first and details follow Contains quizzes tests and

final exams A Survey of European Astronomical Tables in the Late Middle Ages José Chabás, Bernard R. Goldstein, 2012-05-31 This is a survey of the numerous astronomical tables compiled in the late Middle Ages which represent a major intellectual enterprise Such tables were often the best way available at the time for transmitting precise information to the reader Publication of the Astronomical Society of Pomona College , 1915 **Publications of the Astronomical Society of the Pacific** Astronomical Society of the Pacific, 1914 Provides an outlet for current research in astronomy Contains refereed research and instrumentation papers invited reviews and dissertation summaries **Journal of the British Astronomical Association** British Astronomical Association, 1897 List of members 1890 1913 bound with v 1 23

Astronomy Arthur Robert Hinks, 1928 **Astronomy for Amateurs** Camille Flammarion, 1918 Astronomy in a Nutshell Garrett Putman Serviss, 1912 **Astronomy: The solar system** Henry Norris Russell, Raymond Smith Dugan, John Quincy Stewart, 1926 *In Synchrony with the Heavens, Volume 1 Call of the Muezzin* David King, 2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices *Manual of Astronomy* Charles Augustus Young, 1895
