aircraft were supported by a universal network of agents supplying spares and technical assistance They were used for racing and record breaking flights of extreme courage and endurance and small airline activities This new book outlines the early days of the de Havilland Aircraft Company and studies the evolution of each of the Moth family of light airplanes and their engines which took place between 1925 and 1939      **The Tiger Moth Story** Alan Bramson,2005 Previous ed Great Britain Airlife 1982      **The de Havilland Tiger Moth** Aubrey Joseph Jackson,Profile Publications Ltd,1966\*      **De Havilland DH. 60 Moth** Stuart McKay,2005 This book follows on from Midland s earlier successful book on the De Havilland Tiger Moth and examines the history of the DH60 Moth which was first built in the 1920s and was one of the most significant aircraft built up to that time In the 1920s the Air Ministry aware of the need to encourage an interest in flying in order to have a base of potential recruits for the RAF in a time of crisis produced specifications for an aircraft which could be used by flying clubs which it was subsidizing The officially backed prototypes were not favored and it was de Havilland s freelance DH 60 Moth which first flew in February 1925 that proved ideal The Moth quickly became the ideal private owners airplane As the efficiency of production increased engines were improved and the cost of the aircraft dropped To the DH60 Moth can be directly attributed the beginning of the flying club movement in many parts of the world and the growth of private ownership of light aircraft which is still flourishing today Moths were built under license in France Sweden Finland and the USA They were raced aerobatted in formation used by most long distance pilots of the 1920s and 30s seeking to create records flown on floats and skis and used worldwide by air forces and government agencies The successful Gipsy engine was designed specifically for the DH60 Moth and in 1927 the Moth s wooden airframes evolved into metal structures which spawned the Tiger Moth This book will appeal to members of the Moth Club to the many round the world who have flown or operated the airplane and to those interested in aviation history The content focuses on the early days of the Moth and its pivotal role with the early flying club days but the story of this successful aircraft is carried through to the present day which sees many examples of this historic and seminal aircraft still taking to the skies      Flying the De Havilland DH82A Tiger Moth John K.
