Arms Transfers, Neutrality and Britain's Role in the Cold War Marco Wyss,2012-10-12 Great Britain was neutral Switzerland's main supplier of heavy weaponry during the early Cold War Marco Wyss analyses this armaments relationship against the background of Anglo Swiss relations between 1945 and 1958 and thereby assesses the role of arms transfers neutrality and Britain as well as the two countries political economic and military relations By using multi archival research the author discovers traits of specialness in the Anglo Swiss relationship analyses the incentives for Berne's weapons purchases and London's arms sales sheds new light on the Cold War arms transfer system and the motivations of the participating states and questions the sustainability of neutrality during the East West conflict as well as Britain's role from a western neutral and small power perspective

Making Jet Engines in World War II Hermione Giffard,2016-10-10 Our stories of industrial innovation tend to focus on individual initiative and breakthroughs With Making Jet Engines in World War II Hermione Giffard uses the case of the development of jet engines to offer a different way of understanding technological innovation revealing the complicated mix of factors that go into any decision to pursue an innovative and therefore risky technology Giffard compares the approaches of Britain Germany and the United States Each approached jet engines in different ways because of its own war aims and industrial expertise Germany which produced more jet engines than the others did so largely as replacements for more expensive piston engines Britain on the other hand produced relatively few engines but by shifting emphasis to design rather than production found itself at war's end holding an unrivaled range of designs The US emphasis on development meanwhile built an institutional basis for postwar production Taken together Giffard's work makes a powerful case for a more nuanced understanding of technological innovation one that takes into account the influence of the many organizational factors that play a part in the journey from idea to finished product
